WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

PREFACE

This is the initial report in a series on the Aleysk ICBM Complex prepared in response to CIA Requirement C-DI5-82,972 requesting detailed line drawings, to scale, of elements of the complex. The information contained herein is used on KEYHOLE photography through [REDACTED]. Individual reports will be updated periodically to reflect changes observed on subsequent photography.

ALEYSK ICBM COMPLEX, USSR

The Aleysk ICBM Complex is located 151 nautical miles (nm) south of Novosibirsk and 155 nm northeast of Semipalatinsk. It is situated in a sparsely forested agricultural region of relatively flat terrain ranging from approximately 500 to 860 feet in elevation.

The complex (Figure 1) consists of a complex support facility, a rail-to-road transfer point, and 10 confirmed and 1 probable Type IIIC launch sites. To date, this complex extends generally 26 miles north to south and 12 miles east to west. Construction activity was first observed at the complex when Launch Site 1 was identified on [REDACTED]. The complex support facility was not seen until [REDACTED]. it can be negated on [REDACTED]
