SHIPPING CRATES AT AIRFRAME PLANT NO. 47

ORENBURG, USSR

Airframe Plant 47 is located at 51-48N 55-07E in Orenburg, USSR.

Between [redacted] it was covered by [redacted].
 [redacted] During this time the plant expanded from approx-
 imately 1.3 million square feet to 1.9 million square feet of floor space.
 No missiles or missile-related equipment have been identified within the
 plant confines, however, [redacted] good quality missions have revealed
 the presence of crates in the plant shipping area on the south side of
 the facility (Figure 2). These crates measure approximately [redacted]
 feet and have been identified as possible cruise missile crates. The
 following chronological crate count may indicate changes in the level
 of plant activity.

The increased productivity suggested by the plant expansion does not appear to be reflected in the crate count, nor is a new product suggested as the same type of crates have been present throughout the period of observation. This does not preclude the possibility, however, that products may be shipped directly from other parts of the plant which are under roof and therefore cannot be detected.
