CIA IMAGERY ANALYSIS DIVISION

KUN-MING AMMUNITION AND SUPPLY DEPOT  
WA-PAN-CHIAO, CHINA

A previously identified munitions storage site is located at 25-03N 102-50E, 7 nautical miles (nm) east of Kun-ming, China (Figure 1). This installation consists of a munitions storage area, a housing and administration area and a housing and storage area (Figure 3). The site is road-served only.

Munitions Storage Area

Facilities in the munitions storage area include 26 gable-roofed storage buildings (Buildings 1-26, Figure 3) and 2 small support buildings. A small water reservoir and several small water basins are located in this area, probably for use in case of fire. Most of the storage buildings have end walls of heavy construction, probably for blast protection. Additional blast protection is provided for many of the storage buildings by their location in cutbacks in the hillsides. Buildings 19-25, because of their location with respect to each other, are provided with very little blast protection.

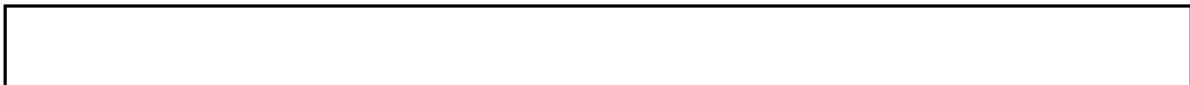

25X1

A refurbishing of Buildings 3 and 4 appeared to be in progress at the time of the [redacted] photography. Several white piles visible near these buildings are probably construction materials to be used in connection with the refurbishing.

Building 19, which was under construction [redacted] (Inset, Figure 2), appears complete on photography [redacted]

Security

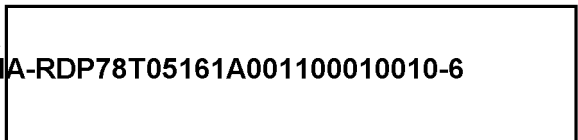

Perimeter security is provided by a system of tactical trenches located in the highest areas of the site (Figure 2). Observation posts are situated at strategic points near the tactical trenches in the munitions storage area (Figure 2). Security fencing was not visible in any area of the site. Vehicular traffic into the munitions storage area is controlled by a guardhouse/checkpoint at the location indicated in Figure 2.

Housing and Administration Area

The facilities in this area include 1 administration building, 2 barracks, 1 small messhall, an athletic field and at least 40 other unidentified support buildings.

CIA IMAGERY ANALYSIS DIVISION

Housing and Storage Area

This area, consisting of 8 warehouses (Buildings 27-34, Figure 3), 11 barracks and 1 messhall, probably provides storage for nonexplosive type military equipment and additional housing for the munitions storage area personnel.

Accuracy Statement

All measurements have been made by the NPIC Technical Intelligence Division with the exception of Building 19 which were made by the CIA/IAD project analyst. The location of Building 19 on the line drawing was also accomplished by the CIA/IAD project analyst.
