SHIPYARD : AMUR SHIPYARD 199
LOCATION : KOMSOMOLSK, USSR
GEO COORDS: 50-33N 137-02E

KEY TO NUMBERED ANNOTATIONS

1. Five unidentified circular objects in a line resting on their transverse axes.
These objects range in diameter from 20' to 25' and appear to have imagery resembling support spiders. See annotation 1, [REDACTED]
2. Unidentified circular objects in random orientation about this area.
3. "PM-124" Class YRSN (LOA approx 310') at fitting-out quay.
The approximate length plus proportioned areas from the bow to the superstructure, the superstructure, and superstructure to the stern equate to this class. This ship was previously berthed at the fitting-out mole near the entrance to the launching basin. See annotation 6, [REDACTED]
4. Large floating crane at the fitting-out quay.
This crane was previously positioned near the gate to the launching basin. See annotation 3, [REDACTED]
5. Probable KRUPNYY Class DDGS hull (LOA approx 450').
See annotation 5, [REDACTED]
6. Upright floating security screen.
7. Unoccupied transporter dock (LOA approx 465').
Since the previous mission [REDACTED], and with the appearance of an "E-II" Class SSGN (annotation 8), this transporter dock and the probable KRUPNYY hull have switched positions at the fitting-out mole. See annotations 4 and 5, [REDACTED]
8. "E-II" Class SSGN (visible waterline length approx 380') berthed between the fitting-out mole and the probable KRUPNYY hull.
Hull outline, lack of a large sail, three white dots on foredeck, and three sets of blast deflectors aft of the apparent after edge of the sail contribute to this identification. This is the first positive sighting of a submarine at Komsomolsk since [REDACTED] (see annotation 2, CIA/PIR-67196).

CIA IMAGERY ANALYSIS DIVISION

- 9. AMGUEMA Class Cargo Icebreaker (LOA approx 440') berthed along the south side of the fitting-out mole near the gate to the launching basin. The masts on this ship have not as yet been erected and are visible lying on the deck. See annotation 2,

2

KEY TO FACILITY ANNOTATIONS

- A. The two new probable fabrication buildings appear to be nearly complete. See annotation A,
- B. Construction is continuing at the western extremity of the transverser. See annotation B,
- C. Footings for a new building. The function of this building cannot yet be determined. See annotation C,
