PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Minsk Petroleum Storage Mikhanovichi is located 18 kilometers (km) south-southeast of Minsk (Figure 1). The installation is connected by secondary roads to the Minsk-Marina Gorka highway, but is not rail served. Minsk Army Barracks Uruchye (AL-1) is located 11 km north-east, Minsk/Machulishche Airfield is 5 km northwest, and an SA-2 SAM site is located 2 km west. Other military installations are located in the Minsk area.

The area covers approximately eight acres and contains nine semiburied POL tanks and one support building (Figures 2 and 3). Two

ground scars from the installation to the airfield indicate a possible pipeline connecting the POL storage area to a rail unloading point at the airfield. Small scale photography precludes determination of security measures.

The area is covered by [redacted] TALENT photography and [redacted] KEYHOLE missions [redacted]. The installation was under construction [redacted]. Eight tanks were observed on [redacted] coverage, the ninth tank was first observed on [redacted] coverage and no additional changes observed as of [redacted] coverage.

DESCRIPTION OF INSTALLATION

Road Service

A secondary road provides access to the Minsk-Marina Gorka highway.

POL Storage Area

There are nine semiburied tanks, each 100 feet in diameter, and one support building. The area was observed being cleared [redacted]. Eight tanks were observed on [redacted] coverage and the ninth tank was first observed on [redacted] coverage.
