LAUNCHER/ERECTOR MENSURATION - LAUNCH SITES 5 AND 6

LAUNCH COMPLEX A, SARY SHAGAN

[Redacted] revealed possible missile launchers and erector/launcher associated devices at Launch Complex A, Sary Shagan ATC, USSR. The Army Map Service, in cooperation with the NPIC/Technical Intelligence Division, has provided mensuration on selected possible missile launchers and associated devices, using a stereo plotter/floating dot technique.

25X1

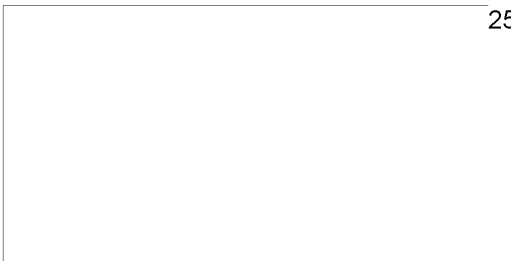

The following mensuration was accomplished of objects at launch points:

Launch Site 3

Launch Position 1	Horizontal measurement
Launch Position 3	Horizontal measurement
Launch Position 4	Horizontal measurement
Launch Position 5	Vertical measurement
Launch Position 6	Vertical measurement

Launch Site 4

Launch Position 4	Vertical measurement
Launch Position 5	Vertical measurement

25X1

The photo quality does not permit a meaningful measurement of angles of elevation, though the possible launchers at position 4 and 5, launch site 4 appear to be in near vertical position. The objects measured at launch points 5 and 6, launch site 3 are still being referred to as erector/launcher associated devices.
