CIA IMAGERY ANALYSIS DIVISION

KRASNOKAMSK PETROLEUM REFINERY

The Krasnokamsk Petroleum Refinery is located on the north bank of the Kama River in the south-central part of Krasnokamsk, Figures 1 and 2. The approximate center of the refinery, which occupies an area of about 260 acres, is located at geographic coordinates 58 04N - 55 47E. The refinery area is separated from the large adjacent pulp/cellulose/paper plant by a fence or wall; the remainder of the area may be enclosed by wire fencing. A spur from the railroad that links Perm and Kirov passes just north of the refinery.

The small scale of available photography does not permit the identification of the processing equipment present in the Krasnokamsk Refinery. Pipe stills and one or more thermal cracking units represent the best possibilities judging from what can be seen on the [REDACTED] coverage, Figure 5.

25X1D

Components of the refinery are: (Annotations keyed to Figure 5)

- (1) Products/crude storage tanks.
- (2) Processing unit(s) - Possible thermal cracker.
- (3) Processing units - Possible pipe stills and/or thermal cracker and a flare tower just south of the processing units.
- (4) Products/intermediates storage tanks.
- (5) Probable products storage tanks.
- (6) Settling ponds for water treatment.

The remainder of the facilities in the refinery area consist of a number of buildings in the NE corner and along the north boundary. A small group of structures immediately north of item 5 may be a small processing facility, the nature of which is not evident.

25X1D

A small tank farm NW of the refinery and adjacent to the rail line may constitute a transfer point for the refinery's products.

25X1D

No significant construction activity can be observed during the period for which photographic coverage is available; [REDACTED], Figures 3, 4 and 5.

All measurements have been made by the CIA/IAD/IB project analyst. They should be considered as approximate and must not be taken as official NPIC mensuration data compiled by the Technical Intelligence Division, NPIC.
