IMAGERY INFORMATION REPORT

NEW HIGH-FREQUENCY RADIO COMMUNICATIONS STATION AT CABINDA CITY, ANGOLA

A new high-frequency radio communications station was identified southeast of Cabinda City within the Cabindan enclave of Angola on imagery  A baseball diamond was also observed, probably indicating the presence of Cuban personnel. Two horizontal dipole antennas are present in a cleared area in which additional antennas will probably be erected. The installation is defended by six unoccupied mortar positions and several automatic weapons-firing positions. A small military post is adjacent to the antenna field and includes six buildings and one vehicle shed under construction. Six 120mm mortars in a towed position are parked in this area.
