MEMORANDUM FOR: Deputy Director of Central Intelligence  
FROM : John F. Blake  
Deputy Director for Administration  
SUBJECT : Annual Report of Accident Analyses

1. The Occupational Safety and Health Act levies a requirement that the head of each agency be made aware of the total accident and injury experience for the agency for each calendar year.

2. There is attached for your review a comprehensive report on this matter prepared by the Office of Security. I would suggest you concentrate on the "Summary", "Special Analyses", and chart "Incidence Rates". Paper clips have been inserted at those three places for your convenience.

3. By way of commentary, I would draw your attention to the last document mentioned, "Incidence Rates". I believe we find ourselves, on a comparative basis, in a fairly favorable position. While we are basically a "white collar" agency, we do have extensive engineering, hardware, and maintenance responsibilities on a world-wide basis. Such positions are sometimes "accident prone". Our rate, therefore, is expectedly lesser than NASA and the federal government as a whole, but greater than the Department of State and the Department of Labor. You might be interested in looking at where the U.S. Civil Service Commission stands. My own off-hand explanation is their high rate is attained by tripping over red tape.

1. I paperclipped some of the interesting data on this Annual Report of Accident Analyses. The chart on page 18 is interesting and again shows that CIA is worse than some agencies and better than some agencies. It certainly appears to be much better than the overall Federal Government agency.

2. How do you propose to brief the Director on this report? A copy of last year's report to the DCI is attached.

MEMORANDUM FOR: Deputy Director for Administration

FROM :   
Acting Director of Security

SUBJECT : Central Intelligence Agency  
Annual Report of Accident  
Analyses - 1975

25X1A

1. Action Requested: It is requested that you brief the Director of Central Intelligence on the occupational accidents, fires, injuries and illnesses that occurred in the Agency in 1975.

2. Basic Data: The Occupational Safety and Health Report of the Central Intelligence Agency's Safety Program submitted to the Secretary of Labor 26 March 1976 advised that a comprehensive report on the total accident and injury experience is prepared annually for the Director of Central Intelligence.

3. Staff Position: The Safety Branch has prepared this report based on accidents, fires, injuries and illnesses defined, reported and recorded in accordance with the Occupational Safety and Health Act. A summary is contained on Page 4 of the report. You will note from Page 4 that the Incidence Rate for occupational injuries and illnesses incurred by CIA employees increased from 1.7 to 1.9; however, this compares favorably with the Incidence Rate for the Federal Government which increased from 4.4 to 5.7. The cost figure increment is largely a function of claims of \$818,438 for two deaths.
