Dear Professor Slinko:

As you may know, I will participate in the U. S. - USSR research project in chemical catalysis. I would thus like to extend an invitation to a Russian postdoctoral fellow to stay with us and would be most grateful if you would find us an interested suitable candidate. We will be able to help the candidate pay his living expenses for a period of three months.

Several members of our department are carrying out research in reaction engineering and catalysis and believe the visit will be of mutual benefit. In view of the short visit and the fact that we do not speak Russian it would be desirable that the candidate will be able to converse in English.

I would be staying outside the U. S. during March-June, 1974. Thus, I would like to arrange for the stay of the postdoctoral either before or after that period.

I look forward to a fruitful exchange of ideas and information.

Sincerely yours,

[Handwritten signature: Dan Luss]
