1. We appreciate your bringing to our attention the fact that G-2 presumes subject document has been compromised, in view of the fact that a copy of it was thrown into the sea on 28 October 1954 when a MATS plane was forced to lighten its load.
2. We have alerted the interested DD/P components of this incident to afford them an opportunity to note on their records this presumed compromise and to take whatever action they should deem necessary.
3. We are returning for your files the copy of subject publication which you transmitted with your memorandum.
