DATE: 6 November 1952

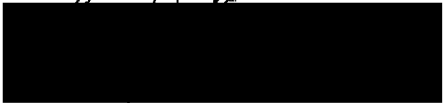

SUBJECT: Revision of ORR Project 13-51 The Volume and Nature of Soviet Bloc Inland Water Traffic, Part II, the Satellites

Subject paper is transmitted herewith in compliance with memorandum from Chief, D/R to Chief, D/S, 14 October 1952, requesting revision in compliance with suggestion of Chief, S/TR.

The disorganization of the original paper precluded any adequate revision short of a completely new draft. For that reason, therefore, no detailed revision has been attempted. Material not considered relevant or adequate, however, has been bracketed in red for deletion if D/R concurs, and information readily available in S/TR files is attached for insertion as indicated in the report.

It is readily recognized that the attachments will in several instances require some additional editing before their incorporation in the report. It was decided, however, to transmit the insertions substantially as extracted from source documents in order to avoid a major task of retyping in S/TR. It was felt, furthermore, that this would impose no real burden upon D/R since the additional editing required would necessitate one or more retypings of the report.

25X1A9a

 in D/R has reviewed this material and says it is acceptable. We assured him of our further cooperation on any specific details.
