

MEMORANDUM FOR THE RECORD

THE PRODUCTION AND CONSUMPTION OF RUBBER  
IN THE EUROPEAN SATELLITES

CIA/RR PR-56

(ORR Project 22.163)

Sanitization of this project has not been made because of the fact that of the 656 sources, 122 are "US OFFICIALS ONLY". The length of time required by FI and OO to check each individual source against the text ~~will~~<sup>would</sup> delay release of the report possibly six months. In addition, there are numerous sources, for example, 458 and 471, which the analyst has listed as "Unidentified sources". Without access to such sources, complete sanitization would be impossible. There are also numerous other sources among the 656 which would be subject to challenge as far as availability of release.
