1. The attached graphic is forwarded in response to your request for a more detailed breakdown of CIA priorities for production of topographic maps on the USSR at the scale of 1:250,000. Priorities have been designated in accordance with guidelines contained in the revised JCS priority system.

2. This graphic should be considered solely as an input to facilitate DIAMC long-term planning of medium-scale topographic map production. The primary CIA requirement for medium-scale maps on the USSR continues to be the Special Intelligence Graphic (SIG) Series.
