SUBJECT: D/GG Program Changes since October 1958 and  
Selected Current Manyear Expenditures

25X1A

e. Geographic Intelligence Memorandum program (DD/I;  
[REDACTED] Intelligence Community).

f. International boundaries and territorial disputes  
(State; DD/P; Sino-Soviet Task Force).

g. NIS Chapter IX coordination - new outline (NIS  
Committee).

25X1A

h. Geographic lectures and special briefings (FSI;  
[REDACTED] OTR).

3. Tasks suspended.

25X1A

a. Unconventional Warfare feasibility studies (control  
pre-empted by [REDACTED])

b. Evasion geographies (cancelled by AD/RR).

4. Present expenditures on selected programs:

a. Guided missiles intelligence - 3 manyears.

Note 1. An additional 10 manyears are assigned to the  
Russian Collation Project (approx 5 manyears currently effective),  
which greatly facilitates this support activity.

25X9A2

Note 2. An additional 0.25 manyears are currently  
expended in support of special clandestine collection programs  
[REDACTED] related to guided missiles intelligence.  
In 1959-1960, the load was 2.8 manyears. There is good reason  
to believe that a substantial revival of support requirements  
will develop by spring, 1962 in response to a recent increase  
in target identification.

b. Nuclear energy intelligence - 0.5 manyears.

Note Subject to very great increase in the event of  
a nuclear test ban treaty; also subject to further AE developments  
in China.

[REDACTED] 25X1A
