MEMORANDUM FOR: Economic Defense Intelligence Committee

FROM : Executive Secretary, EDIC

SUBJECT : Transmittal of Cumulative Listing of Selected  
IWG and EDIC Intelligence Publications

1. Attached for information of the EDAC/ACEP structure is a list of selected IWG and EDIC intelligence publications. Papers of administrative nature have not been included. Attention is invited to earlier listings of IWG documents found in IWG/AM-20 of 4 March 1954 and IWG/AM-20, Supplement 1 of 15 March 1954.

2. Copies of listed papers are available to cleared members of the EDAC/ACEP structure on a need-to-know basis upon request to the Executive Secretary, Code 143, Extension 2635.

ECONOMIC DEFENSE INTELLIGENCE COMMITTEE

Intelligence Request No. 5  
Control No. 2151  
28 April 1955

SUBJECT

Pending Bloc Shipbuilding Orders

REQUESTING AGENCY AND DATE

MDAC and State/ECD; 27 April 1955

DEADLINE FOR RECEIPT OF INFORMATION

April 1955

PROPOSED USE

Information to be used by EDAC in its consideration of current COCOM merchant shipping control proposals. Release for use in COCOM may be requested later.

BACKGROUND AND REFERENCES

This request on EDIC is for purpose of administrative control. The desired information was originally prepared under "Secret" classification for the briefing of the USDEL at the CG meeting in September 1954 and has been kept up to date since then. These revised briefing materials have not been formally released outside CIA.

SPECIFIC INFORMATION AND/OR ACTION DESIRED

The MDAC and State/ECD members of EDIC request that EDIC furnish information on:

- a) 1954 ship deliveries to the bloc by country of origin identified as to whether new or used merchant and fishing vessels; if used, include date of construction.
- b) Projected deliveries (as described in (a) above) for 1955, 1956, 1957, 1958. If possible, projected deliveries should be classified according to firmness of delivery - e.g., whether Trade Agreement commitment, firm contract, etc.

MEMORANDUM FOR: Economic Defense Intelligence Committee  
FROM : Executive Secretary, EDIC  
SUBJECT : CIA Statement on "Exports of Capital Equipment  
and Industrial Materials from the Soviet Bloc

1. In accordance with the EDIC request of 14 April 1955, the attached is circulated for comment and incorporation of other examples, including additional information compiled by CIA.

2. A revised list will be furnished to the EDAC Executive Committee, for guidance as to the utility of studying in greater detail the Soviet bloc export pattern.

EXPORTS OF CAPITAL EQUIPMENT AND INDUSTRIAL  
MATERIALS FROM THE SOVIET BLOC

1. The exportation of capital equipment and industrial materials by the Soviet bloc is a continuing phenomenon, though only scattered instances have engaged the attention of the EDAC Community. A number of traditional East-West trade patterns are of this type; for instance, Hungarian exports of transport equipment, chiefly to France. It is suggested that EDIC periodically review such trade, with a view to detecting possibly significant changes (e.g., in amount, commodity composition or free-world countries involved). In the past, reports indicating major changes have led EDIC to study Soviet bloc exports of petroleum (IWG Case # 72) and of manganese, chrome, platinum and palladium (IWG Case # 60).
2. Soviet bloc motives for exporting strategic commodities appear to be complex and varied. It may be assumed that they always include considerations of tactics, including psychological effect. Moreover, the Soviet bloc is presumably willing to export any commodity in order to obtain, directly or indirectly, something else which it values more. Hence, valid conclusions as to the Soviet bloc supply position in particular commodities can hardly be drawn from the pattern of Soviet bloc exports alone, still less from trade-agreement commitments, offers or propaganda statements.
3. There follows a tabulation, obtained from Foreign Service monthly reports for 1953 and 1954, of capital equipment and industrial materials imported from the Soviet bloc by Belgium-Luxembourg. The commodity descriptions given in these reports are not precise enough to establish whether they include items on the International Lists. Nevertheless, each commodity has been assigned the IL number of the strategic commodity which appears to fall within the reported description. Finally, these imports constitute a very small and not necessarily representative sample, and are cited for illustration only.
