PRESS NOTES
(All Times GMT)

15 January 1960

1. U.S.S.R.

The frequency for the Soviet Information Bureau's Ø 9 service in English radioteletype at 06:00-10:30 (NSun) (p. 1-8) was changed from 20585 kcs to 19625 kcs during September. (0)

2. Albania

The Albanian Telegraph Agency has been conducting test transmissions in radioteletype since early July. Tests were conducted on the ZABI transmitter, which is used also for Tirana voice transmissions, between 8-11 July at 18:15-19:40 on 6900 kcs, 8-10 November at 17:00-17:30 on 6900 kcs, and 19-21 November at 18:15-18:45 on 7158 kcs. Test transmissions in July, based on the on-off keyed system plus or minus 500 cycles at the telegraph speed of 50 bauds, were very poorly received owing to station interference. The tests in November, based on the frequency-shift keyed system plus or minus 500 cycles at the telegraph speed of 50 bauds, were unidentifiable owing to severe station interference. (BBC)

3. Czechoslovakia

According to a CTK dispatch from Prague dated 30 December, Czechoslovakia has 1,351 teleprinter subscribers. Automation of teleprinter exchanges will be completed in the third 5-year plan which will make it possible to connect 600 more subscribers. Also, semi-automatic links will be introduced between Czechoslovakia and all the people's democratic countries. Czechoslovakia now has teleprinter links with twenty-nine countries. "Of these four are overseas countries, the United States--and to Honolulu, Manila, San Juan--Argentina, Brazil, and Canada." Negotiations are now underway for the establishment of a teleprinter link with Italy and Spain and preparations are being made for negotiation with some other countries of Central and South America, according to the dispatch. (BBC)

4. North Korea/Rumania

An agreement on the exchange of news between the Korean Central News Agency and the Rumanian Agerpres agency was signed in Bucharest on 11 November, according to a KCNA dispatch. (0)

5. Poland

Since early September the Polish Press Agency has inaugurated a number of unannounced press transmissions which consist of selected items from the English radioteletype service for Europe.

A radioteletype transmission in English at 14:00-15:00 on SOT34, 18435 kcs at the telegraph speed of 50 bauds was first observed in early September, apparently replacing the English morse transmission for the United States (p. 1-29) which was formerly given on the channel at that time.

PAP radioteletype transmissions in English have been observed since 30 December at 01:00-02:00 on SOP35, 15510 kcs and SOI21, 8133 kcs and at 15:00-15:30 on SOX24, 22495 kcs. (Although the destinations are not mentioned, it is believed that both transmissions are directed to the United States--BIS)

(continued)

OFFICIAL USE ONLY

OFFICIAL USE ONLY

Press Notes (cont'd)

A PAP morse transmission in English has been observed since early December at 02:00-03:00 daily on SOJ22, 9298 kcs. The destination is not announced. (The transmission may be directed to Latin America, however--BIS)

Another PAP morse transmission in English has been observed since early December. It is given at 08:00-09:30 (NSur) on SOT46, 18640 kcs, apparently replacing the English morse transmission formerly given on the channel at 11:15-13:30 (p. 1-29). (BBC)

6. Yugoslavia/Indonesia

An agreement on cooperation between TANYUG, the Yugoslav news agency, and ANTARA, the Indonesian news agency, was signed in Belgrade on 5 October, according to a TANYUG dispatch. (BBC)

7. France

An additional bulletin in French morse from the Diplomatic News Service in Paris was observed in progress at 12:30 on 27 November on V2X, 15595 kcs. The mode of operation was observed to be A1 emission at 30 wpm. (O)

8. Italy

An Italian news agency "AGA," presumably Agenzia Giornali Associati, was observed testing with teletype in Italian on ISZ48, 4804 kcs and ISZ35, 3583 kcs from 19:00 to 20:00 on 3 December. The test transmission included a roundup of world news and ended with a message advising "all listening posts" to listen again at 19:00 on Monday, 7 December. (BBC)

ISY90, 9050 kcs, Rome was observed on 20 November transmitting AIEA material in French morse at 17:00-17:55 for its representative in Cairo. The mode of operation was observed to be A1 emission at 25 wpm. (O)

A new ANSA service from Rome was first observed on 17 November in English radioteletype at 17:00-17:30 for authorized recipients in the Far East on ISX35, 13485 kcs. (O)

9. Netherlands

Scheveningen, ANP, Maritime Press Service in Dutch morse (p. 2-17) was observed on 19 November on PCH, 22570 kcs at 16:15-17:00, a retiming from 16:00-17:00. (O)

10. Switzerland

The 15:00-15:15 World Health Organization epidemiological bulletin from Geneva has been given on the additional channel HBV35, 25132.5 kcs since 15 December. HB088, 18950 kcs and HB034, 14462 kcs continue to transmit the bulletin. (E)

11. United Kingdom

The London office of the Australian publication Melbourne Herald was observed testing with teletype in English on 11485 kcs at 18:15-20:30 (Sunday at 17:00-18:30) in early January. (E)

(continued)

OFFICIAL USE ONLY

OFFICIAL USE ONLY

Press Notes (cont'd)12. Iraq

The semi-official Iraqi News Agency was inaugurated in September, according to various press reports. The agency has not as yet utilized radio for the dissemination of its material, however. (BIS)

13. Morocco

"Maghreb Arabe Presse," the first Moroccan national news agency and a private enterprise, was inaugurated in Rabat on 18 November, according to press reports. An NCNA dispatch from Peking reported that in the beginning this new agency will restrict its service to Morocco but plans to expand to Tunisia, Libya, and the Middle East. Although press reports indicate the use of "teletype equipment in the Arabic and Latin alphabets," material from this agency has not as yet been observed on radio. (BIS)

14. China (Taiwan)

The Central News Agency bulletin in English morse from Taipei for agency offices in the Far East on 3MA24 (p. 4-5) was retimed from 10:10-11:00 to 10:00-10:50 coincident with Taiwan's return to standard time in October. (W)

A new transmission of the Associated Press in Taipei was first observed on 24 September in English radioteletype at 06:30-06:45 for authorized recipients, presumably in the Far East, on BCW23, 18555 kcs. (O)

Taipei's radioteletype transmitter on 19755 kcs (p. 4-7) now identifies as BCP22 instead of BVP22. (O)

15. Thailand

Bangkok, REUTERS, in English morse to Singapore was first observed on 12 January at 09:00-09:30 on HSJ5, 10955 kcs. The mode of operation was observed to be A1 emission at 35 wpm. (This is the first scheduled presscast from Thailand--BIS) (O)

16. Brazil

PPS69, 12252 kcs and PPS32, 6805 kcs, Rio de Janeiro have been observed transmitting in Portuguese morse "TRANSPRESS" material for authorized recipients, presumably in Brazil, since early January. (W)

PPK7, 12010 kcs, Rio de Janeiro was observed on 9 August transmitting press dispatches for PRENSA LATINA in Havana in Portuguese morse at 00:05-01:05 point-to-point to CML54, Havana. The mode of operation was observed to be A1 emission at approximately 40 wpm. (O)

17. Cuba

The director general of PRENSA LATINA announced on 22 December that the agency "will expand its information services to include Europe and Asia. It will establish a direct system of 16 hours daily news transmissions with the countries of Asia, Africa, and Europe. The agency has offices in all Latin American countries except Santo Domingo, Haiti, and Nicaragua. Branch offices will be established in Rome and Paris, thus converting PRENSA LATINA into a world-wide news agency." (E)
