8. The Map at Tab C: Shows the high resolution photographic coverage of North Vietnam (80% or better cloud-free) that has been reported in the three week period ending 13 November. This has been reported in accordance with the photo reconnaissance area grid system. In addition to area coverage, the map shows ten targets that could most likely reveal the introduction of offensive missile systems into North Vietnam. An eleventh target, the Kun Ming railroad yards, is located at 2501N and is consequently off the map.
