MEMORANDUM FOR: COMOR Photo Working Group
SUBJECT: Orbit Select Targets for Mission 4012

1. Attached is a list of targets as selected by the Photo Working Group on 2 September for use in planning Mission 4012. This list takes into consideration intelligence derived from Mission 1009 and using the leapfrog principle those targets believed likely to be covered by Mission 4011.

2. It is to be noted that the list is divided into 3 sections as follows:

a. Principal Target - Target that must be covered once during the mission and preferably within the first 3 days.

b. Primary Targets - The maximum number possible should be obtained in addition to the principal target.

c. Secondary Targets - Targets to break ties between orbits that have the capability to cover the principal target and an equal number of primary targets. The tie to be resolved in favor of the orbit that obtains the greatest number of targets in the category.

3. This list is valid only for the subject mission and will be updated as required.
