WASHINGTON, D. C. 20505

20 February 1976

Colonel Martin Bretting, USAF  
Program Director, Satellite Data System  
Space and Missile Systems Organization  
Los Angeles AFS, California

Dear Colonel Bretting:

I wish to thank you for the briefings and tour which you provided me and my staff last week on the Satellite Data System. I find such an opportunity to inspect hardware firsthand and hear directly from the program directors to be invaluable in my understanding of the complexities of the program. I am very much impressed with the SDS.

You may be assured that I will use the understanding which you provide to me to good advantage in forthcoming sessions with the Congress.

Very truly yours, STATINTEL

  
George Bush
