SECRET

FOREWORD

1. *Objectives and Scope*

The *Economic Intelligence Statistical Handbook, 1961* is a statistical presentation of economic factors helpful in analyzing the economies of the countries of the Sino-Soviet Bloc* and in comparing these economies with the economies of the countries of the North Atlantic Treaty Organization (NATO).** The *Handbook* for 1961 is similar in content and format to previously published editions. Certain minor changes, however, have been made to improve the effectiveness of the publication.

The data for the *Handbook* are presented for the years 1950, 1955, 1958-60, and 1965, with the exception of the data for individual countries of NATO and the Free World, which are presented for the latest 2 years available. In the tables the title, the stub, and the footnotes indicate the countries covered. Certain of the more important economic data are presented graphically and in summary tables. The summary tables compare selected economic indicators for the US and the USSR and for Communist China and India.

2. *Sources and Reliability*

In the *Handbook* for 1961, estimates for the Sino-Soviet Bloc are as of 1 May 1961 and generally are estimates maintained by this Office. When estimates other than

*Including the USSR, Communist China, North Korea, North Vietnam, Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Rumania.

**Including the US, Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the UK, and West Germany. The Saar has been treated as a separate entity for certain commodities because its industrial production often is listed separately in the sources used. Data for Alaska and Hawaii, when available, have been included in the total for the US.

those of this Office are used, specific source references are given. Data for countries of NATO generally are from unclassified publications of the United Nations and the Organization for European Economic Cooperation (OEEC) and from official publications of the individual countries. Data for the most recent year presented are frequently preliminary and subject to revision. Reasonable care has been exercised in selecting sources, and every effort has been made to make the data for the Bloc and NATO consistent as to subject matter.

3. *Footnotes and Symbols*

The importance of the footnotes in the tables cannot be overstressed. These footnotes are used for exceptions to data in the tables and should be noted carefully. In the tables the abbreviations *N.A.* (not available) and *Negl.* (negligible) are used. The abbreviation *N.A.* is used when information as to the existence of the data or the magnitude of the data is not available. The abbreviation *Negl.* is used when data are known to exist but, when recorded in terms of the number of digits used, are less than can be shown.

4. *Rounding and Totals*

Within each table, data for the individual countries have been rounded consistently to permit maximum use of available information. Because of the limitations in accuracy of the totals for NATO, for the Sino-Soviet Bloc, and for the European Satellites, totals, which are in boldface type, have been rounded, with few exceptions, to three significant digits. In general, zeroes appearing after the last nonzero number following the decimal point are not significant but are used merely for consistency in presentations. Because of rounding, components may not add to the totals shown.

SECRET

SECRET

No adjustment is made in the data to compensate for gaps in intelligence. Totals are omitted, however, if the missing data are believed to represent a significant part of the total. Excluded are the countries of the Bloc in which little or no production

takes place or for which data are not available.

5. *Political Boundaries*

Unless otherwise indicated, all data relate to present political boundaries.

CONTENTS

AGGREGATIVE DATA

Table	<i>Page</i>
1. Indexes of Industrial Production for the US, Selected Western Countries, and the Sino-Soviet Bloc, Selected Years, 1950-60	1
2. Official Indexes of Gross Industrial Production for the Sino-Soviet Bloc, Selected Years, 1950-60, and 1965 Plan	2
3. Estimated Gross Investment in Industry in the US and the USSR, 1961	3
4. Estimated Gross National Product at Market Prices, Selected Years, 1950-60, and 1965 Plan	4
5. Distributive Shares of Gross National Product by End-Use (Adjusted Value Added) in the USSR, 1959	5
6. State Budget of the USSR, 1958-60 and 1961 Plan	6
7. State Budget of Communist China, 1956-59 and 1960 Plan	7

ECONOMIC INDICATORS

8. Comparison of Selected Economic Indicators for Communist China and India, Selected Years, 1950-60	8
9. Comparison of Production of Selected Consumer Goods for the US and the USSR, Selected Years, 1950-60	10
10. Apparent Consumption of Selected Products of Light Industry and of Consumer Durable Goods for the US and the USSR, 1955 and 1958-59	11
11. Comparison of Selected Economic Indicators for the US and the USSR, Selected Years, 1950-60, and 1965 Plan	12

POPULATION

12. Estimated Population, Selected Years, 1938-75	15
13. Labor Force in the US and the Sino-Soviet Bloc, Selected Years, 1950-60, and 1965	16
14. Agricultural Employment in the US and the Sino-Soviet Bloc, Selected Years, 1950-60, and 1965	17
15. Nonagricultural Employment in the US and the Sino-Soviet Bloc, Selected Years, 1950-60, and 1965	18
16. Strength of Armed Forces, 1960	19
17. Military Age Group in the US and the Sino-Soviet Bloc, 1956 and Projections for 1961 and 1966	19

FUELS AND POWER

18. Production of Primary Energy, in Standard Fuel Equivalents, in the US and the Sino-Soviet Bloc, Selected Years, 1955-60	20

FUELS AND POWER (Continued)

Table	Page
19. Production of Electric Power, Selected Years, 1950-60, and 1965 Plan	21
20. Production of Coal, in Standard Fuel Equivalents, Selected Years, 1955-60, and 1965 Plan	22
21. Production of Hard Coal, Selected Years, 1950-60, and 1965 Plan	25
22. Production of Brown Coal and Lignite, Selected Years, 1950-60, and 1965 Plan	26
23. Production of Metallurgical Coke, Selected Years, 1950-60, and 1965 Plan	27
24. Production of Crude Petroleum, Selected Years, 1950-60, and 1965 Plan	28
25. Production of Natural Gas, Selected Years, 1950-60, and 1965 Plan	29
26. Production of Petroleum Products, Selected Years, 1950-60, and 1965 Plan	30
27. Production of Gasoline, Selected Years, 1950-60, and 1965 Plan	31
28. Production of Kerosine, Selected Years, 1950-60, and 1965 Plan	32
29. Production of Diesel Fuel, Selected Years, 1950-60, and 1965 Plan	33
30. Production of Lubricating Oils, Selected Years, 1950-60, and 1965 Plan	34
31. Production of Residual and Other Petroleum Products, Selected Years, 1950-60, and 1965 Plan	35

MINERALS AND METALS

A. Iron, Steel, Manganese, and Ferroalloying Metals

32. Production of Iron Ore, Selected Years, 1950-60, and 1965 Plan	36
33. Production of Manganese Ore, Selected Years, 1950-60, and 1965 Plan	37
34. Production of Pig Iron, Selected Years, 1950-60, and 1965 Plan	38
35. Production of Chrome, Selected Years, 1950-60, and 1965 Plan	39
36. Production of Crude Steel, Selected Years, 1950-60, and 1965 Plan	40
37. Production of Tungsten Ore, Selected Years, 1950-60	41
38. Production of Refined Nickel, Selected Years, 1950-60, and 1965 Plan	42
39. Production of Molybdenum, Selected Years, 1950-60, and 1965 Plan	43
40. Production of Cobalt, Selected Years, 1950-60, and 1965 Plan	43

B. Nonferrous Ores and Metals

41. Production of Primary Aluminum, Selected Years, 1950-60, and 1965 Plan	44
42. Production of Bauxite, Selected Years, 1950-60, and 1965 Plan	45
43. Production of Refined Copper, Selected Years, 1950-60, and 1965 Plan	46
44. Production of Primary Lead, Selected Years, 1950-60, and 1965 Plan	47
45. Smelter Production of Primary Tin Metal, Selected Years, 1950-60, and 1965 Plan	48
46. Production of Refined Zinc, Selected Years, 1950-60, and 1965 Plan	49
47. Production of Cadmium Metal, Selected Years, 1950-60, and 1965 Plan	50
48. Production of Mercury, Selected Years, 1950-60	51

^a Indexes for the US, France, Italy, the UK, and West Germany are value-added weighted indexes of intermediate and final products of industry. Industry includes manufacturing and mining and, in most countries, public utilities. The index for the UK includes construction, whereas the indexes for the other Western countries exclude construction. The indexes of the countries of the Sino-Soviet Bloc are calculations of this Office (or other calculations accepted by this Office) and are constructed as nearly as possible on the same basis as the indexes for Western countries. The indexes for the Bloc include manufacturing, mining, and public utilities. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b The base year for the computation of the rate of growth is 1950.

^c This index is the revised industrial production index of the US Federal Reserve Board, which includes utilities.

^d Index of gross values for individual commodities and branches aggregated by 1955 value-added weights. The three sectors covered—materials, machinery, and consumer goods—comprise 44.6 percent, 34.0 percent, and 21.4 percent, respectively, of the value-added weights for industrial production. This index is as comparable as data will permit with the index of industrial production of the US Federal Reserve Board.

^e The projected range of increase for the Seven Year Plan (1959-65) is 8.6 to 9.0 percent (1958=100).

^f Estimates of this Office computed by applying value-added weights to figures for commodity production.

^g Indexes for Czechoslovakia through 1957, for Poland through 1956, and for East Germany in 1955 are from private studies; indexes for Bulgaria in 1955 and 1957 and Poland in 1957-59 reflect official estimates of the growth of net production; and other indexes for these four countries are estimates of this Office, as are all indexes for Rumania and the European Satellites as a group (excluding Albania). Data for Hungary are official estimates of net production that are accepted by this Office.

^a These indexes are measures of the "gross" value of production of industry at constant prices. The gross value of production is, in general, the sum of the value of output of all industrial enterprises. The definition of industry in Communist countries includes manufacturing, mining, and public utilities. The Communist definition of industry also includes other activities (varying from country to country) that are not included in Western definitions of industry. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Unless otherwise indicated, the base year for the computation of the rate of growth is 1950.

^c Index numbers for 1959 and 1960 are based on plan fulfillment data.

^d This "official" index of industrial production was calculated by chaining together annual Chinese Communist claims for the increase in the gross value of industrial production. These annual claims are overstated in varying degrees and are not based on a stable and consistent accounting and price system.

^e Plan data.

^f The base year for this index and for the computation of the average annual increase is 1955, the first postwar year. These official index numbers are not indicative of the true rate of industrial growth, because they reflect in large measure the increases in output resulting from postwar reconstruction rather than from new industrial development.

^g Midpoint of the range of the industrial production index for 1965 of 356 to 367.

SECRET

Table 3

Estimated Gross Investment in Industry in the US and the USSR
1961

Country	Amount
US ^a	19.8
USSR ^b	33.5 to 40.7

^a Anticipated US investments for 1961 in new plant and equipment for manufacturing, mining, public utilities, oil and gas drilling, and other industrial investment not classified in the survey of capital expenditures are estimated as follows (the Department of Commerce and the Securities and Exchange Commission estimate of March 1961):

	Billion Current US \$
Manufacturing.....	14.1
Mining.....	1.0
Public utilities.....	6.2
Oil and gas drilling and other industry not included above..	2.0
Total.....	23.3

The deflator of 117.6 used to derive the value in 1955 US \$ was based on the 1960 deflator for new construction and producers durables, as given in the *Economic Report of the President*, January 1961, p. 132. Based on March 1961 estimates, estimated total expenditures on new plant and equipment by US business will amount to current US \$36.6 billion. These expenditures include, in addition to the above items, expenditures on railroads, other transportation, trade, services, finance, and construction.

^b Industry in the USSR covers manufacturing, mining, and electric power. Urban distribution of electric power is not included. It is estimated that Soviet industrial investment (excluding investment in the construction industry) in 1961 will approximate 59 percent of total planned capital investment, or 171 billion 1955 rubles. Using a conversion rate, based on the Soviet product mix, of 4.2 old rubles to US \$1 this amount is equal to US \$40.7 billion. At the conversion rate, based on the US product mix, of 5.1 old rubles to US \$1, this amount is equal to US \$33.5 billion.

^a A measure of the physical volume of goods and services produced by the economy, expressed in terms of market value at constant prices. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Unless otherwise indicated, the base year for the computation of the rate of growth is 1950.

^c The dollar values of gross national product (GNP) for the European NATO countries (total NATO excluding the US and Canada) in 1955 are estimates of Milton Gilbert and Associates, using the geometric mean of European and US weights. The aggregate GNP for the European NATO countries in 1955 was estimated by the US Department of State using the above source and rough calculations for countries not listed. Estimates for other years were obtained by multiplying the 1955 data in dollars by indexes of GNP at constant domestic prices for the respective countries.

^d Estimated GNP for 1965.

^e Rate of growth for 1951-59.

^f Data for 1949.

^g The base year is 1949.

^h The base year is 1955.

ⁱ The values for the European Satellites have been calculated in such a manner as to make them reasonably comparable with the values shown for the European NATO countries. These estimates for the Satellites, therefore, should not be compared with dollar values for Western countries that are obtained by applying the official rates of exchange.

^j Based on the planned average annual rate of growth of national income. This rate has been reduced by one percentage point as a rough allowance for the exclusion of governmental and personal services under the Communist concept of national income. Such services are expected to grow much less rapidly than the goods and services covered by the plan.

COMPARISON OF GROSS NATIONAL PRODUCT AT MARKET PRICES IN SELECTED AREAS, SELECTED YEARS, 1950-60, AND 1965 PLAN

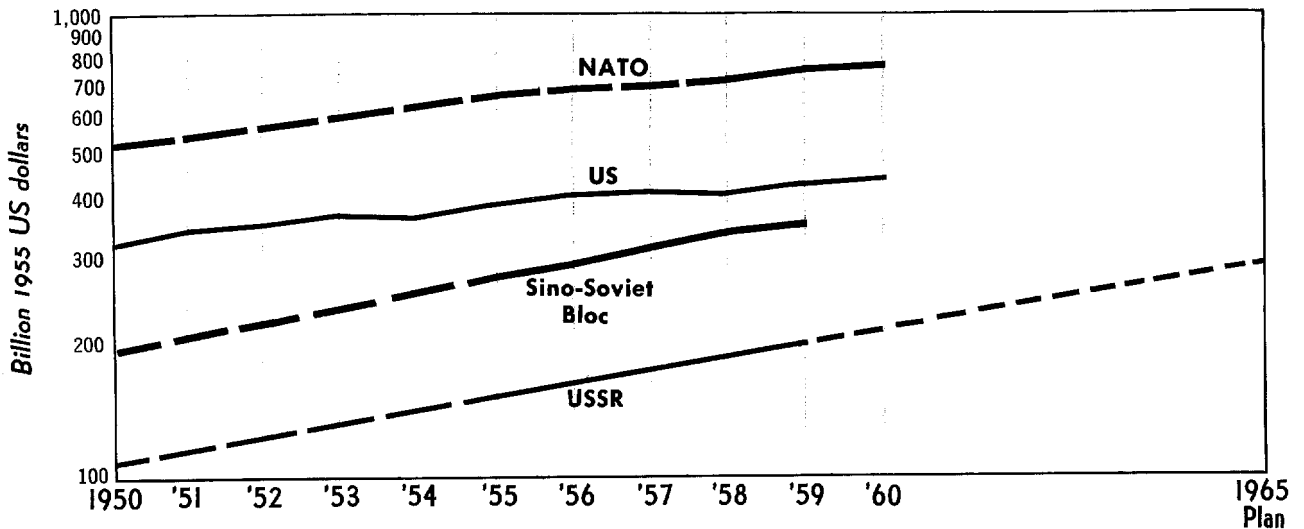

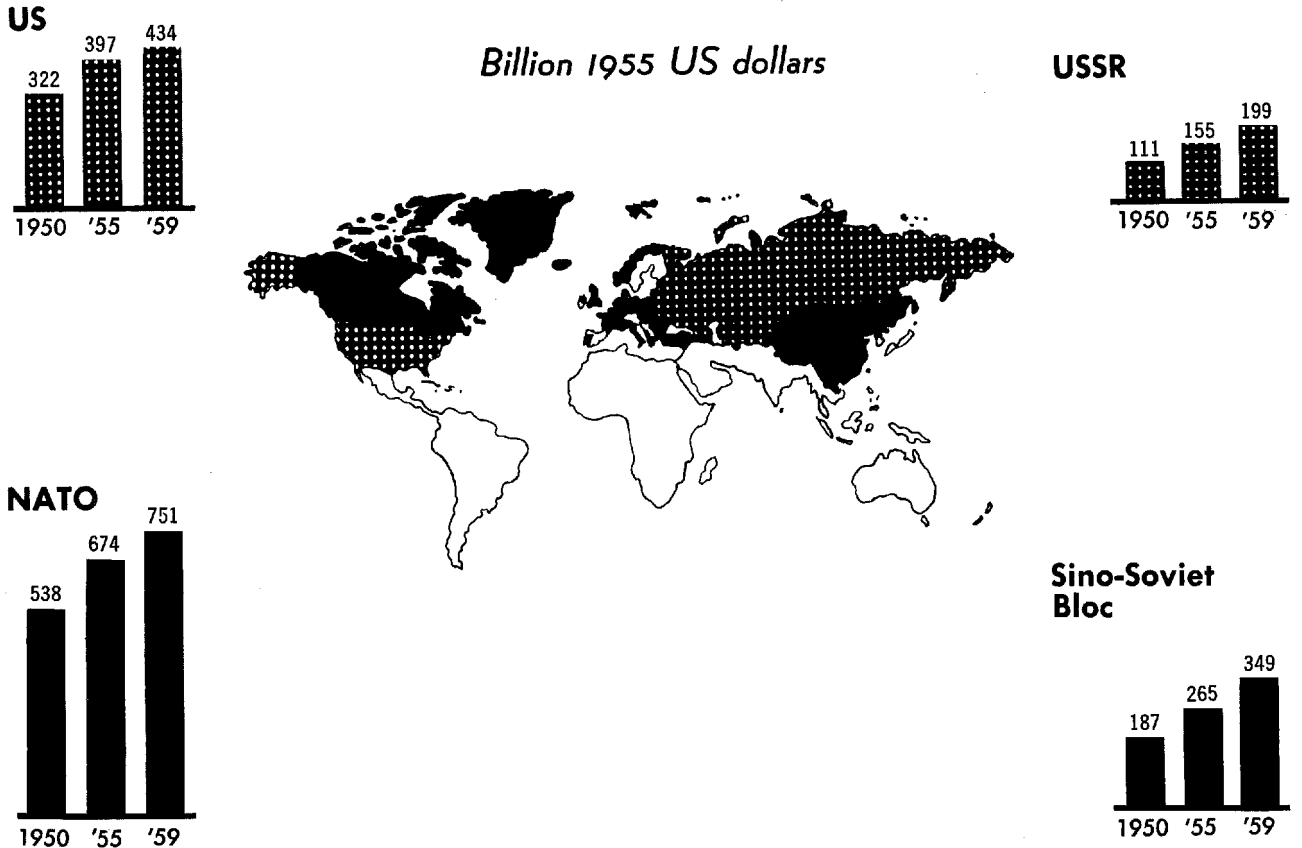

Table 5
 Distributive Shares of Gross National Product
 by End-Use (Adjusted Value Added) ^a
 in the USSR
 1959

Category	Percent of Total
Consumption.....	61
Investment.....	27
Defense.....	10
Administration.....	1
Total.....	100 ^b

^a Percentages are based on ruble values expressed in 1957 prices. Estimated GNP (adjusted value added) for 1959 in 1957 rubles was 1,447 billion rubles. Adjusted value added is obtained by making certain adjustments in the GNP derived by use of official factor prices and quantities. These adjustments are made in order to obtain a measure of GNP more comparable to that for the US.

^b Because of rounding, components do not add to the total shown.

India.....	6.72*	7.44*	7.97*	7.67*	8.91*	2.9*

^a A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements. Data for gross national product for India are unclassified but were not obtained directly from official sources.

^b Unless otherwise indicated, the base year for the computation of the rate of growth is 1950.

^c In order to make data for India more comparable with data for Communist China, computations for both series are based on estimates of internal purchasing power. Data for India, if converted to US dollars on the basis of rates of exchange, converted at 4.762 rupees per US \$1, would be (in billion 1955 US \$): 1950, 20.4; 1955, 23.7; 1958, 26.6; 1959, 26.8; and 1960, 28.4.

^d Data for India are based on the provisionally announced census and exclude Manipur, the Northeastern Frontier Area, Nagaland, and Sikkim.

^e Data are for anthracite and bituminous coal but exclude brown coal and lignite.

^f Including a negligible amount of brown coal.

^g Estimated from planted acreage.

^h Unless otherwise indicated, including automobiles and commercial vehicles.

ⁱ Commercial vehicles only.

^j Grease basis.

^k Rate of growth for 1951-59.

^l Data for 1951.

^m The base year is 1951.

ECONOMIC INDICATORS

Table 10
 Apparent Consumption
 of Selected Products of Light Industry and of Consumer Durable Goods ^a
 for the US and the USSR
 1955 and 1958-59

Product, Unit of Measure, and Country	1955	1958	1959
	Apparent Consumption		
Cotton fabric (million square meters)			
US.....	9,612*	8,478*	9,158*
USSR.....	4,337*	4,203*	4,628*
Wool fabric (million square meters)			
US.....	474.1*	410.7*	471.9*
USSR.....	334*	402*	440*
Leather footwear ^b (million pairs)			
US.....	512.4*	527.8*	569.6*
USSR.....	272*	381*	415*
Refrigerators (thousand units)			
US ^c	3,896*	2,809*	3,520*
USSR.....	151*	347*	402
Washing machines (thousand units)			
US ^c	4,237*	3,584*	3,730*
USSR.....	87*	539*	724*
	Consumption Per Capita ^d		
Cotton fabric (square meters)			
US.....	58*	49*	52*
USSR.....	22*	20*	22*
Wool fabric (square meters)			
US.....	2.9*	2.4*	2.7*
USSR.....	1.7*	1.9*	2.1*
Leather footwear (pairs)			
US.....	3.1*	3.0*	3.2*
USSR.....	1.4*	1.8*	2.0*
	Consumption per Thousand Persons ^d		
Refrigerators (units)			
US.....	23.6*	16.1*	19.9*
USSR.....	0.8*	1.7*	1.9*
Washing machines (units)			
US.....	25.6*	20.6*	21.1*
USSR.....	0.4*	2.6*	3.4*

^a Data are for apparent consumption derived by subtracting exports and adding imports to production. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Data refer to the total production of footwear with leather or mainly leather uppers and exclude slippers.

^c Producers sales.

^d Based on midyear population data.

^a Data refer to total (gross) production at generating centers (therefore including transmission losses and station use). (See footnote a, below). A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Including data for 1951 for the UK.

^c Estimated production for 1965.

^d Data are gross estimates based on reported net, adjusted by increasing by 7.5 percent the thermal electric production to include production that is consumed by the station itself. Hydroelectric production that is consumed by the station itself is a negligible portion of the total gross production. Therefore, no attempt has been made to adjust the net production for hydroelectric power.

^e Estimated plan for 1965.

^f Including production from all areas of Indochina.

^g Production of plants of 1,000 kilowatts or more, covering approximately 98 to 99 percent of the total production.

^h Production for the Saar is included with West Germany.

East Germany.....	6,000	2,200
Hungary.....	4,700	3,250
Poland.....	6,000	2,000
Rumania.....	4,000	1,940

Footnotes continued on page 23.

Table 20 footnotes continued.

The average calorific value for the USSR for 1955-60 and that planned for 1965 is 5,026 kilocalories per kilogram (kc/kg). The average calorific values for the USSR for individual years are as follows:

<u>Year</u>	<u>Kc/Kg</u>
1955.....	5,558
1958.....	5,110
1959.....	5,110
1960.....	5,250
1965 Plan.....	5,250

The average calorific values for Communist China for brown coal and lignite are not available. Average calorific values for hard coal for individual years are as follows:

<u>Year</u>	<u>Kc/Kg</u>
1955.....	6,500
1958.....	5,525
1959.....	5,525
1960.....	4,875
1965 Plan.....	4,875

^e Excluding for all years, Iceland and Luxembourg, and for 1960, Denmark. Production for Belgium, Norway, the Saar, and the UK includes hard coal only. Production for Denmark and Greece includes brown coal and lignite only.

^d Estimated plan for 1965.

^a Unless otherwise indicated, data refer to crude petroleum, including shale oil but excluding natural gasoline. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding Belgium, Denmark, Greece, Iceland, Luxembourg, Norway, and Portugal.

^c Including production for Alaska.

^d Excluding production of synthetic crude oil, except for Communist China.

^e Estimated production for 1965. The plan for 1965 is for 240 million metric tons.

^f Including production of natural and synthetic crude oil.

^g Estimated plan for 1965.

^h Including natural gas.

ⁱ Approximately 98 percent of the total production.

^a Data presented in this table are not intended to be totals of data in Tables 27 through 31 (pp. 31 through 35, below), because this table includes some minor miscellaneous products that are not in any of the following tables. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Unless otherwise indicated, data refer to the total production less consumption at the refineries. Synthetic products and substitute fuels are excluded.

^c Including products obtained from natural gasoline treated in refineries.

^d Data for the Sino-Soviet Bloc include production from indigenous and imported natural crude oil and from synthetic sources. Synthetic production is not included in production for the USSR.

^e Excluding relatively small yields of synthetic stocks.

^f Estimated production for 1965.

^a Unless otherwise indicated, data refer to the gross amount of marketable iron ores in the state in which they leave the mines, including manganiferous ores but excluding pyrites. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding for all years, Denmark, Greece, Iceland, and the Netherlands, and for 1950, Portugal. Metal content of ore in the NATO countries and other Free World countries is as follows: Austria, Luxembourg, the UK, and West Germany, 30 percent; Belgium and France, 35 percent; Italy, Portugal, Spain, and the US, 50 percent; Canada and Japan, 55 percent; Sweden, 60 percent; and India, Norway, Turkey, and Venezuela, 65 percent.

^c Excluding manganiferous iron ore containing 5 percent or more of manganese.

^d The metal content of ore in selected Sino-Soviet Bloc countries is as follows: USSR, commercial grade; North Korea, 50 percent; Bulgaria, 49 percent; Czechoslovakia, 34 percent; East Germany, 26 to 28 percent; Hungary, 28 percent; Poland, 35 percent; and Rumania, 40 percent.

^e Estimated production for 1965.

^f Iron-nickel ore that is mined for its nickel content.

^{*} Revised plan for 1965.

^h Shipments.

ⁱ Including ferrotitanium (about 10 percent of the total).

^j Production of state-owned mines only (57 percent of the total in 1958).

^a Unless otherwise indicated, data refer to the total production of pig iron and ferroalloys, including ferroalloys obtained in electric furnaces but excluding sponge iron. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding Greece, Iceland, and Portugal.

^c Excluding production in electric furnaces.

^d Estimated production for 1965.

^e Including 4.16 million metric tons of "native iron."

^f Including 9.6 million metric tons of pig iron made in "small, modern blast furnaces," of which 5.9 million metric tons were usable for production of steel.

^g Plan data.

^h Although the Bulgarian Yearbook lists these data as pig iron, the data probably refer to iron castings because there were no facilities for production of pig iron before 1957.

ⁱ Revised plan for 1965.

^j Polish official data for production of pig iron were expressed in terms of open-hearth pig iron, which increased actual tonnages. These inflated figures were converted into actual production of pig iron to make them agree with the statistics of other countries by the use of the following factors:

Pig iron to open-hearth steel	+1.0
Pig iron to foundry steel	+1.15
Spiegeleisen	+2.5
Ferromanganese	+2.5

^k Production for the Saar is included with West Germany.

SECRET

^a Unless otherwise indicated, beet sugar. Data are given in terms of the raw value of centrifugal sugar. Refined sugar is equal to approximately 90 percent of raw sugar by weight. Centrifugal, as distinguished from noncentrifugal, sugar includes cane and beet sugar produced by the centrifugal process and is the principal type of sugar moving in international trade. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding for all years, Greece, Iceland, Norway, Portugal, and for 1959-60, Luxembourg. Stated years are for crop years. Generally the harvest season begins in the fall months of the stated year or in the early months of the year following, except in the Southern Hemisphere, where the season begins in May or June of the stated year.

^c Including cane sugar. Including production for Hawaii for all years except 1950.

^d Midpoint of the range of planned production of sugar from sugar beets for 1965 of 9.25 million to 10.0 million metric tons. In 1958, production from sugar beets was 97 percent of the total production.

^e Including cane sugar.

^f Plan data.

* Including sugar from imported beets.

^h Cane sugar only.

^a Unless otherwise indicated, data for the Free World refer to the total production of cotton yarn including mixed yarn. In fact, for many countries, data refer to production of yarn (of all origin) in the cotton industry. Data for the Sino-Soviet Bloc refer to the total factory production. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding for all years, Iceland and Luxembourg, and for 1960, Denmark.

^c Including yarn of synthetic and artificial fibers produced in the cotton industry.

^d Excluding mixed yarn.

^e Government production only.

Rumania.....	<i>Negl.*</i>	3.6*	15.3*	19.3*	24.6*	

^a Metallurgical equipment includes rolling mills; mechanical equipment for coke, blast, and smelting furnaces; mixers; crushers; grinding mills for ore and coal; agglomeration installations; and special hoist-transport mechanisms for metallurgical shops. Equipment for nonferrous shops is believed to be included but probably amounts to only a small percentage of the total physical volume. Data are not available for the US in terms of metric tons. Expenditures in the US in current US dollars for new machinery and equipment for blast furnaces, steel mills, and nonferrous metal-producing facilities totaled for 1950, US \$354 million; for 1955, US \$522 million; for 1956, US \$950 million; and for 1957, US \$1,331 million. Data for later years are not available. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Midpoint of the range of planned production for 1965 of 200,000 to 220,000 metric tons. The plan for 1965 is for rolling mill equipment only, which normally constitutes 50 to 60 percent of all metallurgical equipment produced in the USSR.

^c Including large quantities of small-scale equipment not normally produced in other Bloc countries.

^d Rolling mill equipment only. Production data are not available for all metallurgical equipment.

Rumania.....	450*	1,428*	4,496*	6,870*	14,322*	

^a Including tractor-drawn and tractor-mounted drills. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Including combined seed and fertilizer drills.

^c Excluding tractor-drawn corn planters and tractor-drawn corn and cotton planters. Published data list drawn units as a category without a breakdown into tractor-drawn and horse-drawn units. If it is assumed that the "three-row and larger" drawn corn planters are tractor drawn, production for the years shown would increase by the following amounts: 1951, 80,549 (two-row and larger); 1955, 20,573; 1958, 31,512; and 1959, 59,137.

^d Data for 1951.

^e Estimated plan based on reported deliveries to agriculture of 750,000 tractor drills during the Seven Year Plan (1959-65) and the revised plan calling for production of 146,000 more units during the period 1961-65.

^f Including tractor planters of various types.

^a Unless otherwise indicated, data refer to net metric ton-kilometers and include all goods and livestock carried during the calendar year by trains other than plantation, industrial, mining, funicular, and cable railroads but exclude service traffic, mail, and nonrevenue government stores. Data include domestic, import, export, and transit freight traffic. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign trade freight traffic carried through more than one country, however, is counted in each country. Data for the US specifically include revenue and nonrevenue freight traffic on Class I and II railroads. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Excluding Iceland.

^c Upper limit of the range for 1965 of 1,800 billion to 1,850 billion metric ton-kilometers.

^d Estimated performance for 1965.

^e Including performance of railroads owned jointly by Hungary and Austria and performance by narrow-gauge railroads for "limited public use."

^f Full carloads only; excluding military traffic.

^g State railroads.

^h Data are for years beginning 1 April of the stated year.

ⁱ Including military and government traffic.

^j Excluding livestock.

^k Full carloads only.

^l Including service traffic.

^m Data are for years beginning 1 July of the stated year.

ⁿ Excluding Northern Ireland. Including service traffic.

^o Federal railroads.

^p Government railroads, broad and meter gauge only.

^q Including revenue service traffic.

^a As distinct from radio receivers, wired loudspeakers are connected to government-controlled distribution (wire-diffusion) centers. These centers receive normal radiobroadcasts and retransmit them to loudspeakers by wire or cable. Program reception on wired loudspeakers is thereby restricted to those radiobroadcasts sponsored by the government. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b Including for all years, the Netherlands and the UK; for 1955 and 1959-60, Belgium; and for 1958-60, West Germany. The total for 1958 includes data for 1957 for Belgium. Data refer to the number of licenses issued for wired loudspeakers. The date of information varies during the stated year.

^c Estimated number for 1965.

^d Plan data.

^a Data for the most part refer to all types of domestic telegrams sent, excluding international telegrams and cablegrams. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b The total for 1958 includes data for 1957 for Turkey.

^c Estimated number for 1965.

^d Data include domestic and international telegrams.

^e Data for 1948.

^f Data are for years beginning 1 April of the stated year.

^g Including Algeria.

^h Data are for years ending 30 June of the stated year.

ⁱ Telegrams sent to or received from East Germany and East Berlin are counted as domestic.

^a The subscriber telegraph network service is a two-way service in which a subscriber is provided with a teletype machine connected to a switchboard of a local subscriber telegraph exchange. A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements.

^b In the US, domestic subscriber telegraph service usually is known as TWX rather than TELEX. Data pertain to the number of customers or subscribers and are as of 1 October of the stated year. Data presented previously in the *Handbook* pertained to stations or teletype machines. The number of stations as of 31 December of the stated years are as follows: 1955, 36,857; 1956, 39,256; 1957, 42,197; 1958, 44,649; 1959, 48,622; 1960, 51,744.

^c Plan data.

^d Estimated plan for 1965.

Table 142
Foreign Exchange Rates for Currencies of the Sino-Soviet Bloc ^a
1961

Country	Unit of Currency	Rate of Exchange			
		In Terms of US \$1		In Terms of 1 Ruble	
		Commercial Rate ^b	Noncommercial Rate ^c	Commercial Rate ^d	Noncommercial Rate ^e
USSR.....	Ruble.....	0.90*			
Communist China.....	Yuan.....	2.50* ^f 4.00* }	2.50* ^g	N.A.	1.667* ^h
North Korea.....	Won.....	2.57* ⁱ	2.57* ⁱ	N.A.	1.745* ^h
North Vietnam.....	Dong.....	4.00* ^j	4.00* ^j	N.A.	3.08* ^h
Albania.....	Lek.....	50*	150*	55.56*	100*
Bulgaria.....	Lev.....	6.8*	9.52*	7.56*	8.9*
Czechoslovakia.....	Koruna.....	7.2*	14.34*	8.0*	11.6*
East Germany.....	Mark.....	2.22* ^k	4.2*	2.46* ^l	3.9*
Hungary.....	Forint.....	11.74*	23.48*	13.04*	14.0*
Poland.....	Zloty.....	4*	24*	4.44*	15.0*
Rumania.....	Leu.....	6*	15*	6.67*	9.7*

^a A number followed by an asterisk indicates that the information was obtained directly from official unclassified publications or announcements. Rates of exchange are as of 1 January 1961.

^b Official rate unless otherwise indicated. Usually the official rate is a result of the legal definition of the currency in terms of gold and may not represent internal purchasing power. This rate, however, usually is reliable for converting trade statistics.

^c Tourist rates for Free World currencies. These series of rates are inconsistent with the intra-Bloc series.

^d Official rate unless otherwise indicated. Usually the official rate is a result of the legal definition of the currency in terms of gold and may not represent internal purchasing power.

^e An intra-Bloc series of rates that probably represents internal purchasing power for travelers and embassy personnel.

^f Generally accepted conversion rates, with the rate of 2.5 being used in Free World trade and the rate of 4.0 in Bloc trade. As official rates have never been announced by Communist China, these conversion rates have been estimated and therefore represent only approximations to actual rates.

^g An approximate rate. Actual rates vary depending on the transaction involved and the currency being traded. Actual rates also appear to change from time to time.

^h Estimate.

ⁱ A bank rate. North Korea has not announced an official relationship between the won and Free World currencies. This rate probably is used for noncommercial transactions.

^j An unofficial rate that has been announced in the North Vietnamese press as the relationship of North Vietnamese currency to dollars. This rate probably applies also to noncommercial transactions.

^k Beginning in 1959, the rate of exchange of 4.2 Deutsche Mark East (East German marks) to US \$1 has been employed in quoting commercial trade totals. No announcement has been made, however, concerning a change in the official commercial rate of exchange.

^l The unofficial rate actually used in East German accounting of foreign trade transactions is 4.67 Deutsche Mark East to 1 ruble. See footnote k, above.
