*Economic Intelligence  
Statistical Handbook  
1970*

This handbook was produced solely by CIA. It was prepared by the Office of Economic Research. Data on military expenditures and equipment and on the construction of maritime vessels were supplied by the Office of Strategic Research.

SECRET

25X1

i NOTE: The data for gross national product (GNP) are for 1969 (in 1968 prices) converted to US purchasing power equivalents, except for Canada, India, Cuba, Communist China, North Vietnam, and North Korea. Data for Canada (in 1968 prices) are GNP converted at the par value exchange rate of 1.081 Canadian dollars to US \$1. Data for India (in 1968 prices) are GNP converted at the par value exchange rate of 7.5 rupees to US \$1. Data for Cuba (in 1957 prices) are GNP for 1968 converted to US dollars using prevailing exchange rates. Data for Cuba are given in 1957 prices to minimize the inflationary effects during the last several years. Data for GNP for Communist China are for 1966 and for North Vietnam (in 1964 prices) for 1964. Data for North Korea (in 1967 prices) are for GNP for 1966 and are converted at the exchange rate of 1.2 won to US \$1. All data on inhabitants are for midyear 1969 and data on land mass are for the latest year available.

**EAST EUROPEAN  
COMMUNIST COUNTRIES**

LAND MASS: 990,000  
square kilometers  
INHABITANTS: 102.8 million  
GNP: US \$ 148 billion

**USSR**

LAND MASS: 22,272,000  
square kilometers  
INHABITANTS: 240.2 million  
GNP: US \$ 448 billion

**NORTH KOREA<sup>†</sup>**

LAND MASS: 122,000  
square kilometers  
INHABITANTS: 13.8 million  
GNP: US \$ 3.0 billion (1967 prices)

**JAPAN**

LAND MASS: 370,000  
square kilometers  
INHABITANTS: 103 million  
GNP: US \$ 200 billion

**NORTH VIETNAM<sup>†</sup>**

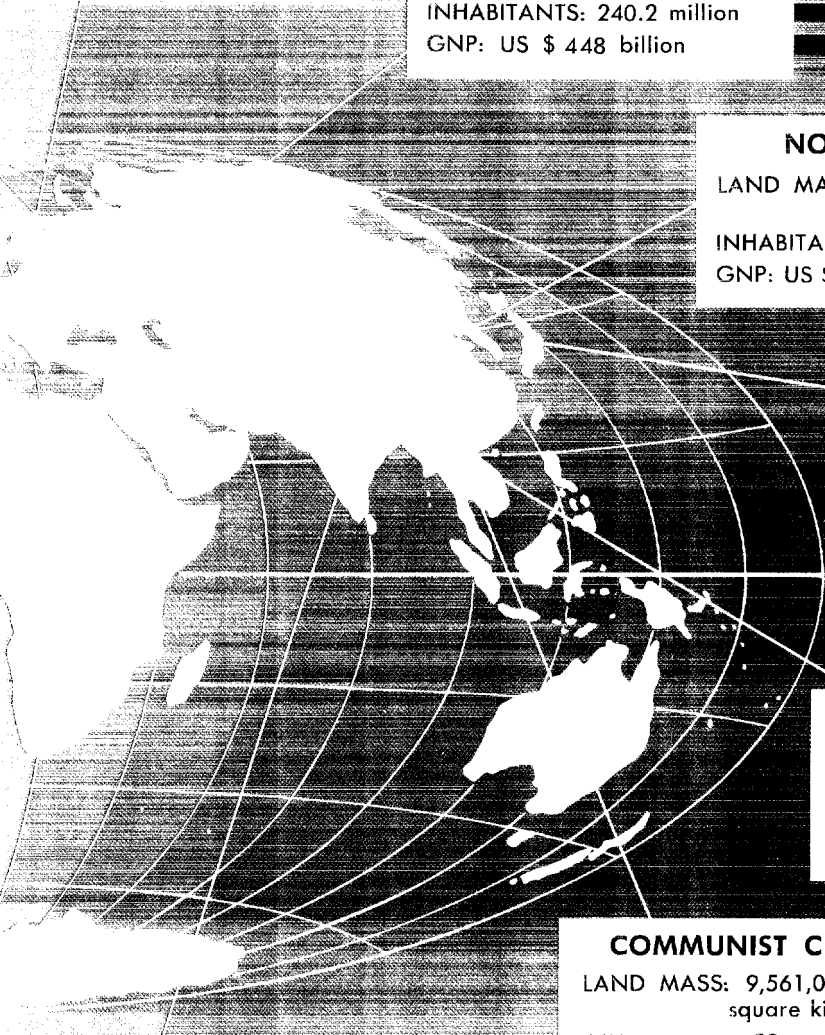

LAND MASS: 159,000  
square kilometers  
INHABITANTS: 19.7 million  
GNP: US \$ 1.6 billion (1964 prices)

**COMMUNIST CHINA<sup>†</sup>**

LAND MASS: 9,561,000  
square kilometers  
INHABITANTS: 824 million  
GNP: US \$ 86 billion

**INDIA<sup>†</sup>**

LAND MASS: 3,268,000  
square kilometers  
INHABITANTS: 537 million  
GNP: US \$ 41 billion

## FOREWORD

### 1. Purpose and Scope

The *Economic Intelligence Statistical Handbook, 1970* provides statistics on the economies of the Communist countries and the countries of the North Atlantic Treaty Organization (NATO)—including France. New tables and graphics have been added to make possible more explicit comparisons.

In general, the data in the *Handbook* are for 1960 and 1965-69. A summary table is presented for European NATO, Eastern Europe, each of the Communist countries, selected NATO countries, India, and Japan. The data for Mongolia, because of their scarcity, are presented in a summary table but, in general, are not included in the individual commodity or aggregative tables. The graphics are designed for use as visual aids. Footnotes have been used liberally to give definitions, exceptions, and methodology. Footnotes to the commodity tables give more detailed definitions of the data than those appearing for the commodities on the summary table for each country. Therefore, the footnotes to the commodity tables should be referred to when a complete description of the data shown is required.

### 2. Rounding of the Totals

In each table the data for the individual countries have been rounded consistently. Because of the limitations in the cumulative data, the totals have been rounded, with some exceptions, to three significant digits. In general, zeros appearing after the last nonzero number following the decimal point are not significant but are used merely for consistency in presentation.

Totals are not presented if missing data are believed to represent a significant part of the total. In general, data are not given for countries for which a significant amount of data is not available. Because of rounding, components may not add to the totals shown.

### 3. Symbols

The abbreviation N.A. (not available) is used when information about the existence of the data or the magnitude of the data is not available, and the abbreviation *Negl.* (negligible) is used when the magnitude of the data is less than half of the final unit employed for each table. The metric system is used throughout.

[Redacted]

### 5. Sources

The data given for the most recent years are frequently preliminary and subject to revision. The data for the Communist countries are estimates of this Office, official data from the country cited, or estimates made by other organizations. The data for the NATO and other Free World countries are from publications of the United Nations and the Organization for Economic Cooperation and Development (OECD), are from unclassified publications of other international organizations or individual countries of the Free World, or are estimates of this Office.

### 6. Terms

Unless otherwise indicated, the term *Communist Countries* includes the USSR, the countries of Eastern Europe, Communist China, North Korea, North Vietnam, Albania, Cuba, and Yugoslavia; the

25X1

term *Eastern Europe* includes Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Romania. The term *NATO* includes the United States, Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the United Kingdom, and West Germany. The term *developed countries* includes Austria, Belgium, Denmark, Finland, France, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Norway, the Netherlands, Sweden, Switzerland, the United Kingdom, West Germany, Australia, Canada, Japan, New Zealand, South Africa, and the United States. The term *less developed countries of the Free World* includes (1) all countries of Africa

except the Republic of South Africa, (2) all countries of East Asia except Japan, (3) Portugal and Spain in Europe, (4) all countries in Latin America except Cuba, and (5) all countries in the Near East and South Asia.

As far as possible, production data for the Saar have been included in the data for West Germany for all years, unless otherwise indicated. Data for Alaska and Hawaii, when available, have been included in the total for the United States. Data for any of the above country groupings may or may not include all of the countries listed above, depending on the commodity or services listed.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> For the individual European NATO countries, the ratios for converting gross national product (GNP) in national currencies at 1968 prices into 1968 US dollars on the basis of US purchasing power equivalents are derived from the 1950 ratios in Milton Gilbert and Associates, *Comparative National Products and Price Levels*, OEEC, Paris, 1958, using the geometric mean of European and US weighted ratios. These 1950 ratios were moved to 1968 by applying the following factor: the derived price indexes for each European country for 1950-68 divided by a derived price index for the United States for 1950-68. These price indexes were derived for each country by dividing the growth of GNP in current prices by the growth of GNP in constant prices. The ratios thus obtained were applied to the GNP values, given in the national currencies in 1968 prices. The total GNP for the European NATO countries is based on the estimate that the total GNP of the individual countries shown represents 95% of the total European NATO GNP, which is the approximate relationship derived from other sources. The values shown for the Communist countries have been calculated in a manner which makes them reasonably comparable with the values shown for the NATO countries.

<sup>b</sup> The base year is the year prior to the stated period. Rates of growth are derived from unrounded data.

<sup>c</sup> Converted at the exchange rate of 1.081 Canadian dollars to US \$1.

<sup>d</sup> Including data for West Berlin, for which separate data are not available.

GNP.....	865.7*	434.1 <sup>b</sup>	50

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> US market prices. Total Soviet gross national product (GNP) and the various end uses were converted to dollars not by the official rate of exchange but by the average purchasing power ratio of the dollar and the ruble calculated from actual or estimated prices paid for various goods and services in the two economies. For GNP as a whole and for each end use component of GNP, these average ratios (ruble-dollar ratios) were estimated by weighting individual price ratios by both US and Soviet expenditure weights. The geometric mean of the US weighted and Soviet weighted ratios was then used for the conversion of Soviet values into dollars.

The magnitudes for the Soviet end use components were calculated to measure quantity of output compared with the United States but not the cost in resources. The share of total economic resources devoted to a particular end use or the share of total output originating in an individual sector (for example, agriculture or industry) in the USSR should be measured in internal ruble prices and costs. Agriculture alone, for example, uses 32% of the labor force, or 41 million people, as a result of the inefficiency of that sector in the USSR.

The adjusted end uses of GNP are defined as follows:

(1) Consumption comprises personal expenditures for goods and services for all purposes and noninvestment outlays by government for goods and services for health and education. (The personal consumption expenditures for the United States are \$536.6 billion.)

(2) Investment is defined (a) for both the United States and the USSR as the sum of expenditures for gross private domestic investment net of inventories; for public construction other than that for defense facilities; for equipment purchased by the government except that for defense; and for defense stockpiling and defense-production expansion; and (b) for the United States, as also including expenditures by state and local government for development of atomic energy. (The gross private domestic investment for the United States is \$126.3 billion.)

(3) Defense as a component of GNP comprises government purchases of goods and services for the military services, federal government expenditures on atomic energy development, and outlays on space research and technology. Defense excludes stockpiling activities and net military grants for foreign military assistance. (The federal government purchases of goods and services for national defense, excluding purchases by NASA, for the United States are \$78.0 billion.)

(4) Other for the USSR includes inventory change, administration, net exports, and a statistical discrepancy. Administration includes expenditures on civilian internal security, general agricultural programs, public organizations, government administration, and social welfare. Other for the United States includes administration, net exports and military assistance, change in inventories and stockpiles, and a statistical discrepancy. Administration is the residual left after all current expenditures for national defense, health, education, and all capital expenditures are subtracted from government purchases of goods and services. (There is no equivalent category for the unadjusted data for the United States.)

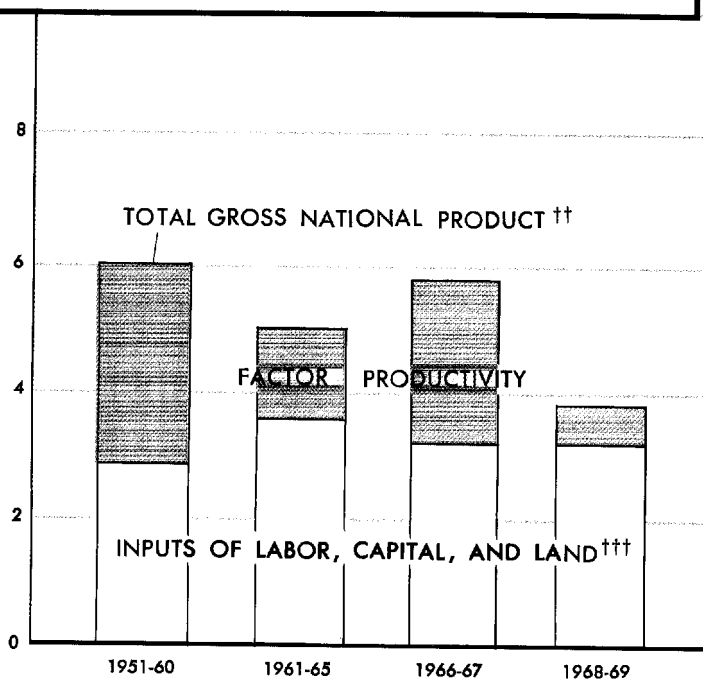

<sup>b</sup> The sum of the end use components of Soviet GNP, valued in dollars, does not equal the dollar value of aggregate GNP, because of the use of average ruble-dollar ratios in converting from ruble values to dollar values. Nevertheless, the individual end use components were not adjusted to agree with the total, since the US-USSR comparisons shown are believed to give the best available description of relative size.

## AGGREGATE FACTOR PRODUCTIVITY IN THE USSR

	AVERAGE ANNUAL RATE OF GROWTH (PERCENT) †			
	1951-60	1961-65	1966-67	1968-69
GROSS NATIONAL PRODUCT ††	6.0	5.0	5.8	3.8
FACTOR PRODUCTIVITY				
Labor (manhours), capital, and land	3.0	1.4	2.6	0.6
Manhours	5.4	3.1	4.0	1.9
Capital (including livestock)	-3.0	-3.3	-1.6	-3.3
Land	2.9	4.4	6.4	3.5
INPUTS				
Labor (manhours), capital, and land †††	2.9	3.6	3.2	3.2
Manhours	0.6	1.9	1.8	1.9
Capital (including livestock)	9.3	8.6	7.6	7.4
Land	3.0	0.6	-0.6	0.3

† The base year is the year prior to the stated period.

†† Based on indexes of GNP (1960 rubles), by sector of origin, at factor cost.

††† Inputs of manhours, capital, and land are combined using weights of 69.21%, 26.41%, and 4.38%, respectively, in a Cobb-Douglas (linear homogeneous) production function. These weights represent the distribution of labor costs, charges on gross fixed capital (including livestock), and land rent in 1960, the base year for all indexes underlying the growth rate calculations.

# INDUSTRIAL AND AGRICULTURAL FACTOR PRODUCTIVITY IN THE USSR

	AVERAGE ANNUAL RATE OF GROWTH (PERCENT) †			
	1951-60	1961-65	1966-67	1968-69
INDUSTRIAL PRODUCTION	9.8	6.6	7.3	5.5
FACTOR PRODUCTIVITY				
Labor (manhours) and capital	4.8	1.4	2.4	0.9
Manhours	7.0	3.4	3.7	2.0
Capital	-1.5	-4.1	-1.3	-2.3
INPUTS				
Labor (manhours) and capital ††	4.8	5.1	4.7	4.6
Manhours	2.6	3.2	3.4	3.5
Capital	11.5	11.2	8.7	8.0

† The base year is the year prior to the stated period.  
 †† Inputs of manhours and capital are combined using weights of 74.5% and 25.5%, respectively, in a Cobb-Douglas (linear homogeneous) production function. These weights represent the distribution of labor costs (wages and social insurance deductions) and capital costs (charges on fixed and working capital and depreciation) in 1960, the base year for all indexes underlying the growth rate calculations.

	AVERAGE ANNUAL RATE OF GROWTH (PERCENT) ‡			
	1951-60	1961-65	1966-67	1968
AGRICULTURAL PRODUCTION ††	4.3	3.4	4.3	0.6
FACTOR PRODUCTIVITY	2.1	1.3	2.2	-0.6
INPUTS †††	2.2	2.1	2.0	1.1

‡ The base year is the year prior to the stated period.  
 †† Percentages were derived from output data, using three-year moving averages.  
 ††† Inputs of mandays, fixed capital, land, livestock, and current purchases are combined using weights of 57.3%, 8.4%, 17.3%, 2.9%, and 14.1%, respectively, in a Cobb-Douglas production function. These weights represent the monetary or inputted costs attributed to each of the inputs in 1959, the base for all indexes underlying the growth rate calculations.

Romania.....	100*	113*	131*	135*	132*	132*	2.5*	4.0*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> These indexes are estimates of this Office. They are based on the value of crop production less feed (including imported grain), seed, and waste; plus the value of livestock products, including changes in livestock numbers. FAO/OECD West European regional price weights (1952-56 average) were used to compute the indexes.<sup>b</sup> The base year is the year prior to the stated period.

<sup>a</sup> These indexes are measures of the "gross" value of production of industry at constant prices. The gross value of production is, in general, the sum of the value of output of all industrial enterprises. The definition of industry in Communist countries includes not only manufacturing, mining, and public utilities, as in most Western definitions of industry, but also certain other activities (varying from country to country).

<sup>b</sup> The base year is the year prior to the stated period.

<sup>c</sup> Estimated.

<sup>d</sup> Rate of growth for 1966-68.

<sup>e</sup> Socialized industry only.

Welfare services.....	5,692	8,164	9,160	10,523	11,434	11,800

<sup>a</sup> The data for 1960 and 1965-68 are from the Soviet statistical handbook *Narodnoye khozyaystvo SSSR* for 1967 and 1968. It should be noted that Soviet investment data are subject to frequent revision. In fact there is evidence that the data for 1968 have been altered to some degree (see *Vestnik statistiki*, no 2, 1970, p. 92-93). The evidence, however, is not sufficient to warrant presentation of a complete revision.

<sup>b</sup> Data are expressed in investment prices of 1 July 1955 adjusted to reflect subsequent introduction of the following changes: new unit valuations (1956), reduction of overhead cost norms (1958), reduction of equipment installation prices (1959), and reduction of prices for project-survey work and of unit valuations for some types of construction-installation work (1962).

<sup>c</sup> Estimated to the nearest hundred million rubles. The data were first estimated in prices of 1 January 1969 (the reporting prices for investment now in official use) and were then converted to prices of 1 July 1955 using estimated conversion ratios. When Soviet handbooks for 1969 and 1970 are published, they may show the old (1955) prices through 1970 (the end of the current five-year plan) or a new series for 1969 and 1970 in prices of 1 January 1969 linked to the old by a common year (1968 or 1969) or an entirely revised series in prices of 1 January 1969.

<sup>d</sup> Preliminary.

<sup>e</sup> Rounded to the nearest hundred million rubles.

<sup>f</sup> Excluding the construction industry. Investment figures for individual branches of industry have been estimated for 1968 and 1969.

Refrigerator production (thousand units)				
United States.....	3,475	4,930	5,150	5,630
USSR.....	529	1,675	3,155	3,700
Refrigerators in use <sup>k</sup> (units per thousand persons)				
United States <sup>l</sup> .....	279	292	301	304
USSR.....	13 <sup>j</sup>	59 <sup>j</sup>	89	106

<sup>a</sup> The data do not necessarily represent food available for consumption, because imports of foreign grain and exports of domestically produced grain are not included.

<sup>b</sup> Excluding corn silage and forage but including sorghum for grain.

<sup>c</sup> Including miscellaneous grains and pulses.

<sup>d</sup> Data are on a carcass weight, bone-in basis.

<sup>e</sup> Excluding slaughter fats, poultry, rabbit, and variety meats.

<sup>f</sup> Including slaughter fats, poultry, and edible offal.

<sup>g</sup> Data are for factory sales and include complete units exported for assembly.

<sup>h</sup> As of the end of the registration year.

<sup>i</sup> Based on data for production, imports, exports, and estimated retirements.

<sup>j</sup> As of the end of the year.

<sup>k</sup> Unless otherwise indicated, data are as of the beginning of the year.

<sup>l</sup> Data are understated because they are based on the number of households with one or more units; thus, a household with more than one is counted as having only one.

<sup>a</sup> The base year is the year prior to the stated period.

<sup>b</sup> The official Soviet measure is based on a Marxist concept of national income and differs significantly from the concept used in Western market economies. For example, the Soviet measure excludes the value of services and overstates the contribution of industry by including all indirect taxes.

<sup>c</sup> Official "gross" value series.

<sup>d</sup> Including production of gas from coal and shale.

Table 15

Distribution of Defense and Space Expenditures,<sup>a</sup> by Major Mission, in the US and the USSR  
1969

	US <sup>b</sup> (Fiscal Year)	USSR <sup>c</sup> (Calendar Year)	
	Billion Current US \$	Billion 1968 US \$	Billion New Rubles <sup>d</sup>
Strategic attack .....	5.5	7.0	2.6
Strategic defense .....	2.2	5.9	2.0
General purpose .....	33.4	18.9	5.6
RDTE&S <sup>e</sup> .....	14.0	15.1	7.0
<i>Of which:</i>			
Space .....	6.3	7.2	3.4
Other .....	29.4	18.1	4.3
Total .....	84.5	65.0	21.6

<sup>a</sup> To achieve as high a degree of comparability as possible, adjustments have been made to the basic data available for both the United States and the USSR. For example, the ruble data, by mission, shown here differ somewhat from the comparable data shown in the following table. All expenditures for research, development, test, and evaluation (RDT&E) activities associated with military programs as well as expenditures for both civilian and military space programs have been aggregated and are included under RDTE&S (RDTE and space programs). All expenditures for nuclear warheads have been aggregated and are included under "Other." All expenditures for military assistance and civil defense programs have been excluded.

<sup>b</sup> Planned total obligational authority (TOA). It should be noted that the pattern of expenditures shown for the United States is not representative of the pre-Vietnam period.

<sup>c</sup> These data for the USSR are reviewed and updated several times each year. Therefore, if they are to be used for more than general background purposes, the Office of Strategic Research should be consulted to insure that they represent the latest available information. The Soviet expenditures presented in dollars are measures of Soviet programs computed on the basis of US factor costs and do not measure program costs as seen by Soviet planners.

<sup>d</sup> In 1955 prices.

<sup>e</sup> Expenditures for research, development, test, and evaluation for all military programs and nuclear energy programs as well as all expenditures for military and civilian space programs.

Command and general support <sup>f</sup> . . . . .	2.6	2.9	3.0	3.1	3.2	3.2
Total military expenditures . . . . .	14.7	17.6	18.7	19.9	20.6	21.6
Of which:						
Military machinery . . . . .	8.5	10.9	11.9	12.9	13.4	14.2

<sup>a</sup> These data are reviewed and updated several times each year. Therefore, if they are to be used for more than general background purposes, the Office of Strategic Research should be consulted to insure that they represent the latest available information. The estimates conceptually include all outlays for personnel and other operating costs, procurement of all hardware used by the military establishment (including nuclear warheads), construction of facilities, military and nuclear research and development activities, and all space programs but exclude military assistance programs. Many of the funds required to cover these expenditures come from sources other than the budget category labeled "Defense" by the USSR. Most of the figures in the table are derived from detailed calculations of the estimated size and cost to deploy and operate individual program elements of the Soviet military establishment. These estimates are subject to considerable uncertainty and should not be considered as precise measures. Nevertheless, the estimates are as accurate and as comprehensive as the data available during 1969 permitted.

<sup>b</sup> In 1955 prices.

<sup>c</sup> Including expenditures for tactical aviation.

<sup>d</sup> Including expenditures for naval aviation.

<sup>e</sup> Expenditures for research, development, test, and evaluation for all military and nuclear energy programs as well as all expenditures for military and civilian space programs. These data include personnel costs for military personnel associated with RDTE&S programs. The estimates in this table are derived from analysis of published Soviet financial data and do not represent detailed calculations of the estimated magnitude and cost of individual programs.

<sup>f</sup> Expenditures for reserve training, militarized security forces, retirement pay, and paramilitary training, in addition to command and support for the active military establishment.

<sup>a</sup> Excluding the armed forces.

<sup>b</sup> Annual averages of monthly data. Data are for civilian employment and differ from those presented in Figure 19. Data in Figure 19 are for farm employment and include farm operators doing one or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages. Data in Figure 19 are based on a survey of farm payrolls conducted by the US Department of Agriculture. Data for the agricultural labor force are based on a household survey of the entire population conducted by the US Bureau of the Census. Data in Figure 19 are a more comprehensive count of agricultural employment and are considered to be more comparable to data presented for the USSR, whereas data in this table are considered to be more comparable to data presented for the Communist countries as a whole.

<sup>c</sup> Excluding militarized security forces.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Estimates of this Office computed by applying value-added weights to data for commodity production. The data are fragmentary and uncertain; therefore, the index should be regarded as providing only a tentative indication of the general level and trend in production.

<sup>b</sup> Data exclude the armed forces but include the unemployed.

<sup>c</sup> Energy expressed in coal equivalents has a calorific value of 7,000 kilocalories per kilogram.

<sup>d</sup> Including a negligible amount of brown coal.

<sup>e</sup> Including 13.4 million metric tons of pig iron made in "small blast furnaces," of which 6.5 million metric tons were usable for steelmaking.

<sup>f</sup> Data are for barley, corn, oats, rice, rye, and wheat, and also include kaoliang, broad beans, and field peas. Tubers are included on a grain equivalent basis of 4 metric tons of tubers to 1 metric ton of grain.

<sup>g</sup> Data are in terms of product weight containing 20% nitrogen (N), 18.7% phosphoric acid (P<sub>2</sub>O<sub>5</sub>), and 40% potassium oxide (K<sub>2</sub>O).

TAB

US AND SOVIET ECONOMIC AID EXTENDED TO LESS DEVELOPED COUNTRIES OF THE FREE WORLD

Figure 11

<sup>†</sup> Except for Southern Yemen these data include only those less developed countries to which both US aid and Soviet aid were extended during 1966-69 (all those to which Soviet aid was extended but not all to which US aid was extended). US data are for 1 July 1966 to 1 July 1969.

<sup>††</sup> Including economic and technical assistance and defense support obligations under the Foreign Assistance Act and antecedent legislation, authorized Inter-American Development Bank loans, \$1,490 funds earmarked for shipments of surplus agricultural products, authorized long-term export-import Bank loans, and US contributions to international organizations.

<sup>†††</sup> Data are for extensions, not actual drawings, and include credits and grants.

<sup>‡</sup> A minus sign indicates deobligations in excess of new obligations.

† Except for Southern Yemen, these data include only those less developed countries to which both US aid and Soviet aid were extended during 1954-69 (all those to which Soviet aid was extended but not all to which US aid was extended). US data are for 1 July 1954 to 1 July 1969.

†† Including economic and technical assistance and defense support obligations under the Foreign Assistance Act and subsequent legislation, authorized Inter-American Development Bank loans, PI 480 funds earmarked for shipments of surplus agricultural products, authorized long-term Export-Import Bank loans, and US contributions to international organizations.

††† Data are for extensions, not actual drawings, and include credits and grants.

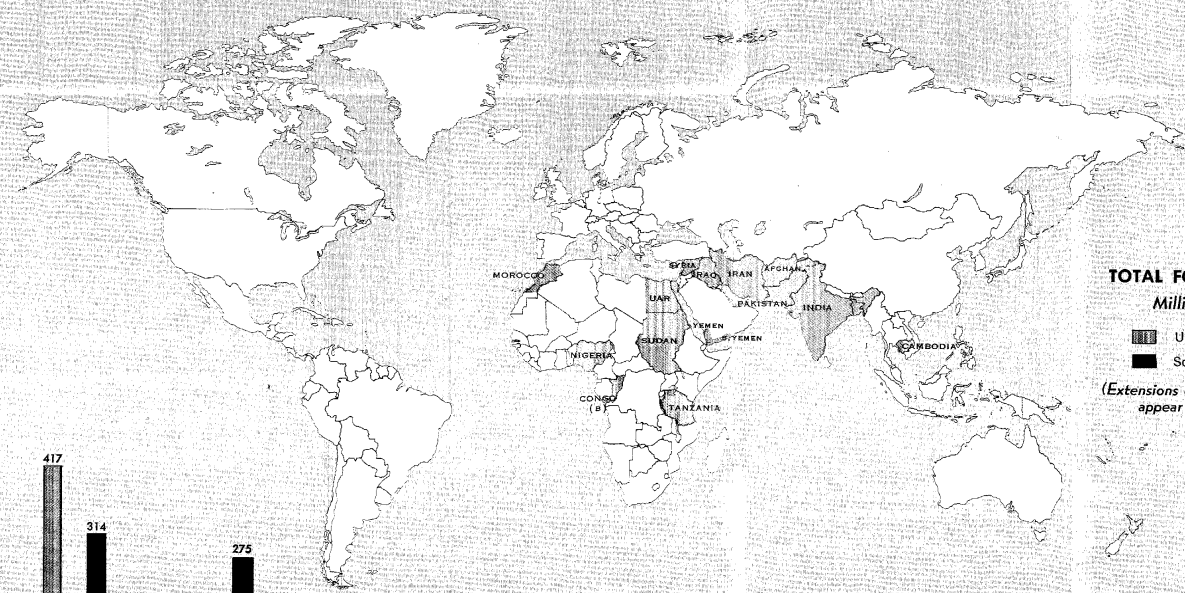

‡ A minus sign indicates debilitations in excess of new obligations.

††† Credits extended after the formation of the Laos Coalition Government under the Geneva Accord of July 1962.

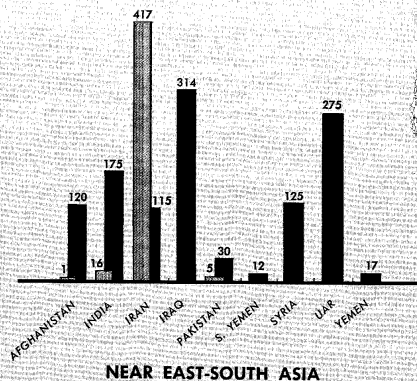

Approved For Release 2003/08/05 : CIA-RDP79S01091A000200010001-8

<sup>a</sup> Data reflect numbers of aircraft, ships, and sites having missile capability.

<sup>b</sup> Including nonjet combat aircraft, trainers, transports, and helicopters.

<sup>c</sup> Number of fighter aircraft equipped with AAM's (two to four per aircraft).

<sup>d</sup> Number of SAM firing battalions, or sites (six launchers per site, four missiles per launcher).

<sup>e</sup> Ship launched. These data constitute the number of Komar- and Osa-class ships equipped with SSM's (two to four per ship).

<sup>f</sup> An undetermined number of SAM's have been received.

<sup>g</sup> Excluding those fighters assembled at the aeronautics plant in Nasik.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Nitrogen fertilizer (in terms of nitrogen), phosphorous fertilizer (in terms of phosphoric anhydride), and potassium fertilizer (in terms of potassium oxide).

<sup>b</sup> Data are "fertilizer years"—in general, the year beginning 1 July of the stated year.

Table 79

Production of Mineral Fertilizer in the US and the USSR  
(In Terms of Soviet Statistical Reporting Units <sup>a</sup>)

Thousand Metric Tons

	1960	1965	1966	1967	1968	1969
United States <sup>b</sup> .....	32,320	53,797	58,929	64,083	65,524	65,431
USSR.....	13,867	31,253	35,866	40,083	43,469	46,000

<sup>a</sup> Soviet production of fertilizer is usually reported as follows: nitrogen fertilizer on the basis of fertilizer containing 20.5% nitrogen, potassium fertilizer on the basis of 41.6% potassium oxide, and most types of phosphorous fertilizer on the basis of 18.7% phosphoric anhydride. In addition, total production includes an insignificant quantity of microfertilizer.

<sup>b</sup> Data are based on US production given in pure nutrients and recomputed to conform to the Soviet method for expressing production. Data for the United States are "fertilizer years" beginning 1 July of the stated year.

Greece.....	1.5*	2.1*	2.8*								

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data are for coal, crude oil, natural gas, and hydroelectric power expressed in terms of coal equivalents (calorific value of 7,000 kilocalories per kilogram), and exclude minor fuels such as peat, shale, and fuelwood.

<sup>b</sup> The following coefficients were used to convert the sources of primary energy into hard coal equivalents: coal (metric tons), 1.0; brown coal and lignite (metric tons), 0.29; crude oil (metric tons), 1.3; crude natural gasoline (metric tons), 1.5; natural gas (1,000 cubic meters), 1.33; and hydroelectricity (1,000 kilowatt-hours), 0.55. Production of geothermal and nuclear electric power is included at the same ratio as hydroelectricity.

<sup>c</sup> Including data for Luxembourg.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for (where produced) gasoline, kerosine, distillate fuel oil, lubricating oil, residual and other petroleum products, natural gasoline, and liquefied petroleum gases. Data exclude some minor miscellaneous products such as white spirits and asphalt.

<sup>b</sup> Including only data for the United States and those countries listed under "Other NATO Countries."

<sup>c</sup> Data include products from indigenous and imported natural crude oil and from synthetic sources. Synthetic production is not included in production for the USSR.

<sup>d</sup> Including data for Algeria.

Japan	676*	1,726*	2,160*								

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data include only gas from natural gas wells and associated gas from petroleum fields.

<sup>b</sup> Including only data for the United States and those countries listed under "Other NATO Countries." Data are for net production—that is, for gas actually collected and utilized as fuel or raw material. They thus exclude gas used for repressuring, as well as gas flared, vented, or otherwise wasted, whether or not it has first been processed for the extraction of natural gasoline.

<sup>c</sup> Data for the United States are in terms of net marketed production and agree with the general definition for the NATO data. Data for the USSR are believed to refer to gross production less losses and waste. US gross production (less losses and waste), which would include gas returned to reservoirs in order to maintain horizon pressure would be as follows (in billion cubic meters):

1960	1965	1966	1967	1968
411	500	528	560	589

A much smaller share of total production in the USSR is believed to be used for repressuring.

<sup>d</sup> Gross production.

<sup>e</sup> Production from gasfields only.

<sup>f</sup> Data are for the previous year.

<sup>g</sup> Including gas used for repressuring and gas wasted.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data are for total (gross) production at generating centers and therefore include transmission losses and station use. (See footnote b.)

<sup>b</sup> Data are gross production or estimates of gross production based on reported net, adjusted by increasing by 7.5% the thermal electric production to include production that is consumed by the station itself. Hydroelectric production that is consumed by the station itself is a negligible part of the total gross production. Therefore, no attempt has been made to adjust the net production for hydroelectric power.

<sup>c</sup> Data are for the year beginning 1 April of the stated year.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for pig iron and blast-furnace ferroalloys and exclude ferroalloys obtained from electric furnaces and sponge iron.

<sup>b</sup> Including only data for the United States and those countries listed under "Other NATO Countries."

<sup>c</sup> Including 13.4 million metric tons made in "small blast furnaces," of which 6.5 million metric tons was usable for steelmaking.

<sup>d</sup> Including small quantities of foreign-produced pig iron returned to furnaces.

<sup>e</sup> Including data for West Berlin, for which separate data are not available.

<sup>f</sup> Data may include some electric-furnace ferroalloys.

<sup>g</sup> Excluding ferroalloys.

<sup>h</sup> Data are for the previous year.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for the gross amount of marketable iron ores in the state in which they leave the mines, including manganiferous ores but excluding pyrites.

<sup>b</sup> Including data for the United States and those countries listed under "Other NATO Countries." The metal content of the ore in the NATO countries and other Free World countries follows: Luxembourg and the United Kingdom, 27%-30%; Austria, Belgium, France, and West Germany, 31%-34%; Greece, Italy, Portugal, Spain, and the United States, 46%-50%; Canada and Japan, 55%; Turkey, 60%; Sweden, 61%; and India, Norway, and Venezuela, 57%-62%. The metal content of iron ore in Denmark is not available.

<sup>c</sup> Excluding manganiferous iron ore containing 5% or more of manganese.

<sup>d</sup> The metal content of the ore in selected Communist countries follows: the USSR, in terms of dressed ore, 55% of the ore; Communist China, 20%-50%; North Korea, 40%-50%; Albania, 50%-55% (1% nickel); Bulgaria, 38%-50%; Czechoslovakia, 34%; East Germany, 25%-30%; Hungary, 24%-28%; Poland, 30%; Romania, 32%-40%; Yugoslavia, 40%; and North Vietnam, 55%.

<sup>e</sup> Based on an announced increase for 1965 of 24% applied to 1964 plan data.

<sup>f</sup> Iron-nickel ore that is mined for its nickel content.

<sup>g</sup> Shipments.

<sup>h</sup> Data are for the previous year.

<sup>i</sup> Data are for concentrates only and exclude titaniferous ores.

<sup>j</sup> Excluding certain grades.

<sup>k</sup> Merchant ores and concentrates.

<sup>l</sup> Including data for West Berlin, for which separate data are not available.

<sup>m</sup> Including iron sand and ferro-manganese ore.

<sup>n</sup> Including concentrates.

USSR.....	29.9*	34.6*	38.4*	41.1*	42.1*	42.7*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Power-driven metalforming machine tools that are not supported in the hands of an operator when in use and are designed to press, forge, emboss, hammer, extrude, blank, spin, shear, and bend metal into shape.

<sup>b</sup> Unless otherwise indicated, data exclude manually operated bending and forming machines, spinning lathes, and riveting, canmaking, die-casting, wire-weaving, wiredrawing, knurling, and marking machines, which usually are included in the definition of metalforming machine tools by the US Department of Commerce.

<sup>c</sup> Including manually operated bending and forming machines for which separate data are not available.

Table 119

Production of Metallurgical Equipment<sup>a</sup> in Selected Communist Countries

Thousand Metric Tons

	1960	1965	1966	1967	1968	1969

USSR.....	218.3	242.3	252.2	289.9	322.5	319.0
Czechoslovakia <sup>b</sup> .....	105.1	85.5	89.6	79.2	90.3	N.A.
East Germany <sup>c</sup> .....	15.9	19.8	25.7	22.8	15.6	N.A.
Poland.....	21.7	40.1	38.3	44.0	43.1	43.6
Romania.....	27.2	40.5	48.4	51.4	58.5	N.A.

<sup>a</sup> Unless otherwise indicated, data are for rolling mill equipment; mechanical equipment for coke, blast, and smelting furnaces; mixers; crushers; grinding mills for ore and coal; agglomeration installations; and special hoist-transport mechanisms for metallurgical shops. Equipment for nonferrous shops is believed to be included but probably amounts to only a small percentage of the total physical volume. Data for the United States are not available in terms of metric tons.

<sup>b</sup> Beginning in 1965, data include fewer components and spare parts.

<sup>c</sup> Rolling mill equipment only.

Table 120

Production of Electric Motors<sup>a</sup> in Selected Communist Countries

Thousand Kilowatts

	1960	1965	1966	1967	1968	1969
COMMUNIST COUNTRIES

USSR <sup>c</sup> .....	9,200*	14,625*	15,172*	14,684*	15,800*	15,100*
Czechoslovakia.....	1,555*	1,994*	1,363*	1,290*	1,198*	N.A.
Poland <sup>d</sup> .....	186*	471*	647*	830*	1,100*	1,283*
Romania <sup>e</sup> .....	98*	27*	44*	95*	85*	N.A.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for steam and hydraulic turbines. Most production of turbines is for use in matched sets with generators for production of electric power. In addition, turbines are produced in single units for many purposes, including direct industrial drives, marine propulsion, and pipeline transmission.

<sup>b</sup> Shipments of units 4,000 kilowatts and larger. Data are available only for turbines produced as integral units together with generators. Therefore, data for turbines and generators for the United States are assumed to be the same. Some turbines are produced in single units but no data are available on this production.

<sup>c</sup> Including a small number of gas turbines.

<sup>d</sup> Steam turbines only.

<sup>e</sup> Steam turbines of more than 500 kilowatts only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for beet sugar produced in the calendar year. Data are given in terms of the raw value of centrifugal sugar. Refined sugar is equal to approximately 92% of raw sugar by weight. Centrifugal, as distinguished from noncentrifugal, sugar includes cane and beet sugar produced by the centrifugal process and is the principal type of sugar moving in international trade.

<sup>b</sup> Including only data for the United States and those countries listed under "Other NATO Countries."

<sup>c</sup> Including cane sugar.

<sup>d</sup> Refined, including imported raw sugar.

<sup>e</sup> Including raw sugar imported for refining.

<sup>f</sup> Raw cane sugar of 96° polarization.

<sup>g</sup> Crop years ending 30 June of the stated year.

<sup>h</sup> Including data for Luxembourg.

<sup>i</sup> Data are for the Azores and Madeira only.

<sup>j</sup> Cane sugar only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Excluding urban systems; plantation, forest, mine, industrial plant, underground, funicular, and cable railways; and short lines of little importance. Unless otherwise indicated, data are for the state or principal railroad system and include all goods and livestock carried during the calendar year and exclude service traffic, mail, and nonrevenue government stores. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign trade freight traffic carried through more than one country, however, is counted in each country. Data for the United States include express and mail and are specifically for revenue and nonrevenue freight traffic for a more realistic comparison with Soviet methods of reporting.

<sup>b</sup> Including only data for the United States and those countries listed under "Other NATO Countries."

<sup>c</sup> Including secondary or private railroads operating as common carriers.

<sup>d</sup> Including service traffic.

<sup>e</sup> Including mail and passenger baggage. Data are for the year beginning 1 April of the stated year.

<sup>f</sup> Including military and government traffic.

<sup>g</sup> Excluding livestock.

<sup>h</sup> Excluding express parcels.

<sup>i</sup> Including data for the Ofoten railroad.

<sup>j</sup> Data are for the year beginning 1 July of the previous year.

<sup>k</sup> Excluding data for Northern Ireland.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Units of two, four, or more axles. Unless otherwise indicated, data refer to both state and private ownership of cars used on the state or principal railroad system. Data are as of the end of the year. Because of the lack of comparability in data, totals for the NATO and the Communist countries are omitted.

<sup>b</sup> Units of four or more axles.

<sup>c</sup> Including secondary or private railroads operating as common carriers.

<sup>d</sup> In recent years, about 90% of the freight cars had four or more axles, and these cars accounted for more than 95% of total freight-carrying capacity.

<sup>e</sup> Excluding narrow-gauge rolling stock.

<sup>f</sup> The majority are four-axle units.

<sup>g</sup> Including Chinese freight cars in transit or on loan.

<sup>h</sup> Data are for the previous year.

<sup>i</sup> Data for government railroads are for the stated year, and data for private railroads are for the previous year.

<sup>j</sup> Excluding privately owned tank cars and including data for Northern Ireland.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Ships of 1,000 gross register tons (GRT) or more. Unless otherwise indicated, data are as of the end of the year. Data for the NATO countries include all combination passenger and cargo ships, whereas, unless otherwise indicated, those for the Communist countries exclude passenger ships that have small cargo capacities.

<sup>b</sup> Data are as of midyear.

<sup>c</sup> Excluding ships operating only on the Great Lakes and US-owned ships flying the Liberian, Panamanian, and other "flags of convenience."

<sup>d</sup> Excluding the Caspian Sea fleet and including refrigerator ships and tankers serving the fishing fleet.

<sup>e</sup> Before August 1968, a few additional Bulgarian-owned ships were operated under the flags of Free World countries.

<sup>f</sup> Until March 1967, an undetermined number of Czechoslovak-flag ships were jointly owned with Communist China.

<sup>g</sup> Including some ships flying the Polish flag but under the control of the Chinese-Polish Shipbrokers Corporation. At the end of 1969, there were 13 of these ships, totaling 112,991 GRT.

<sup>h</sup> Including coastal passenger ships.

<sup>i</sup> Except for 1960, data include a number of ships jointly owned by the Chinese-Albanian Joint Stock Shipping Company. At the end of 1969, there were four of these ships, totaling 30,811 GRT.

<sup>j</sup> Excluding Greek-owned ships flying the Liberian, Panamanian, and other "flags of convenience."
