

Intelligence Process Course -- Evaluation Form

Name →

(Optional)

STATINTL

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

*It seems to me that each goal has been beautifully met. The course objectives would serve equally well as a course description. Everything was treated in an admirably "mature" manner.*

*Note: Shorter, longer, more breaks etc would easily permit this course to be given in four weeks, without losing any substance. (The printing press film could be deleted).*

2.

5. Requirements exercise: learning by doing is fun and effective. A good exercise to help us verbalize the difficulties in tailoring requirements to sources and situations.

6. [ ] An effective speaker, made some good points about ~~xxxxxx~~ "constructive duplication."

7. [ ] A personal and persuasive view of the roll of the NIO (Ie. [ ] view) and effective use of examples in demonstrating problems and frustrations in providing intelligence to policy makers.

7. Oral Briefings: As painful as the first "televised" briefing was the much more effective presentations given on the Friday was the reward.

3/

3. OSO-ELINT Presentation: Would liked to have more on the analytical process.

4. Movie: "Who Owns the Sea?" marginally effective in raising the international issues surrounding LOS. Was great on environmental issues.

5. [ ] ~~xxxxxx~~ Obviously all were very uncomfortable. I think if he had been able to present his material on a theoretical and abstract he would not have had to become entrapped by his current position.

6. ASA - Rather than wiring diagrams a prestation on the ~~tactical~~ use of SIGINT at a theater level, or army level. Besides why couldn't we give equal time to the Naval Security Group on the subject of SIGINT at sea sigint support to the fleet commander

7. DIS: again down with wiring diagrams: Could the navy brief ofx on the US Ocean surveillance system: sensors and methodologies. The Army: Intelligence support to the Theater Commander either Europe or Korea. Air Force: Intelligence Support to Strategic Air Command.

8. DIA: Could we go to Arlington Hall for an overview briefing of DIA and then meet with area analysts within our various areas of interest.

9. [ ] PEI: While her subject may have been very important, she was not ~~xxxxx~~ effective in getting her message across.

Slight

Highly Satisfactory

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why.

- NSA - organization, capabilities disc - Future capabilities great
- OWI } how they analyze, what info they need
- OSI }
- NPIC/IAS - I like photo interpretation
- OSO - didn't know anything about it before

3. Identify the least effective presentations, visits or exercises and explain why.

DIA - irrelevant organization charts & worthless info  
no examples of how they analyze

NMJC - why not see NMCC as well, didn't show  
how they operate only examples of  
projects under construction

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?

Major deficiency was in the intelligence community -  
policy maker relationship. It would appear the  
top honchos can't tell the difference between  
presenting objective analysis & policy recommendations.

Highly Satisfactory

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why.

Each and every visit to the [redacted] proved to be extremely interesting to me. The presentations were well done w/ ~~both~~ interaction of both chiefs & analysts to give broad overview of that particular office's functions. Opinions seemed to be honest and candid in the presentation of problems & achievements.

The role of the Intelligence Community in the area of policy formulation offered a keen insight as to our importance and ability to deal w/ decisionmakers & underlined grave problems in structure, communications etc.

3. Identify the least effective presentations, visits or exercises and explain why.

The least effective presentations were those given by the officers in NSA, DIA & NPIC. Too much emphasis was placed on organizational structure & technical abilities w/ little importance to the actual functioning, problems & successes within these agencies. There was no recognition of the analyst's role nor of inter-agency interaction (except on structural level). In all, I felt the presentations geared to specialists not generalists, overburdened w/ structural aspects, and an unwillingness to deal candidly & honestly as

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?

The overall objectives of the course were highly achieved by maintaining both proper focus and balance among the 4 principal areas of concern. Within these 4 areas, I felt that too much time was spent at NSA, DIA & NPIC where too much detail was given on one subject to generalists. In contrast, our briefings by OGR, OSR & OER were 1/2 day briefings which proved highly effective to the group as a whole as well as being more within each class member's sphere of interest.

Concerning general topics, I would have enjoyed a briefing on the Communist threat in the 1980's and the role U.S. will be playing in perceiving threats & protecting world democracy. The Soviet role in world affairs.

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why. I particularly enjoyed the TV presentation exercise on Wednesday, 13 April. The experience of making a talk in front of a camera, combined with the pressure of being rated by your peers on your performance made the exercise very worthwhile.

3. Identify the least effective presentations, visits or exercises and explain why. I don't feel that I wasted my time at any presentation, visit or exercise. Admittedly, some presentations could be improved, but only cosmetically. If I had to identify a presentation most in need of cosmetic repair, the briefing by the two INTRCOM (?) Army captains would get the nod. As people are fond of saying, 'you get out of it, what you put into it.' If you were willing to listen, this course was certainly well worth the time.

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?

You might not believe this, but the only thing I really missed was a "plumbing diagram" showing the structure of the intelligence community in general, and DDI in particular. As much as I enjoyed the first TV presentation, I thought the second presentation required of us two days later was somewhat of an anti-climax.

Thanks to  for managing an excellent course.

(Optional) STATINTL

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

Slight

Highly Satisfactory

INTELLIGENCE PROCESS COURSE #3-77  
21 March - 22 April 1977

Monday, 21 March

Room 912, C of C

0845-1000

Course Introduction

25X1A

- Administrative Affairs
- Presentations and Introductions
- Class Members' Profiles and Interest Inventory
- Security Arrangements
- Overview and Requirements

Intelligence  
Training Branch,  
Office of Training

1015-1200

Film: Scientific Intelligence in  
World War II

*Many of the tenets and practices that underlie intelligence work today were developed in World War II. This film illustrates how finished intelligence, based on and including a meshing of requirements, all-source collection, analysis, and appropriate methods of presentation, affects policy decisions.*

1200-1300

LUNCH

1300-1430

Directed Reading:

-History of the Central Intelligence Agency, Senate Report, pp. 1-107 (to be read as time permits)

-A Guide to the National Intelligence Community's Production Organizations and Their Products

-Perspectives for Intelligence; 1976-1981

-The Director of Central Intelligence, Senate Report

-CIA Production of Finished Intelligence, Senate Report

1430-1600

The Intelligence Cycle

ITB

25X1A

*U.S. positive foreign intelligence is presented as a continuous process involving close interaction between the policy-level user of foreign intelligence and collectors and analysts.*

CONFIDENTIAL

Tuesday, 22 March

Room 912, C of C

0845-1000 Directed Reading:

-Communication Between the DDO and  
DDS&T on Human Source Collection

25X1A

1000-1045 Classification and Compartmentation

[Redacted]

ITB

*This session will be a brief review of compartmented clearances, what they mean, and when they are applied; it will include a definition of terms and an explanation of restrictions and caveats.*

1100-1200 Film: A Point in Time

*This film traces the development of today's overhead reconnaissance systems.*

1200-1315 LUNCH

1315-1345 Film:

*This is a special film developed to explain a new imagery collection system.*

25X1A

1400-1600 Requirements

[Redacted]

*The establishment of collection goals and work priorities for both collectors and analysts is one of most important and frustrating tasks of resource managers. During this session, the formal and informal structures for determining what to collect will be explored.*

Thursday, 24 March

Room 912, C of C

0830-0915

Directed Reading:

-Selection Of Clandestine Targets  
in the DDO

25X1A

0930-1015

Videotape: The DDO -- Today and  
Tomorrow

In  overview of  
the DDO, he focuses particularly on  
priority collection targets and  
assesses our performance.

Associate Deputy  
Director  
for Operations -

25X1A

25X1A

1030-1200

Clandestine Collection of Information

*The focus is on the operations  
officer as collector in the intel-  
ligence process. The speaker also  
discusses the importance and means for  
continuing communication between  
operations officers and the analysts  
they serve.*

Center for the Study  
of Intelligence

1200-1300

LUNCH

25X1A

1300-1430

1445-1630

Requirements Exercise

ITB Staff

*Based on a prescribed scenario,  
the students will develop a set of  
national intelligence requirements,  
to determine which intelligence  
collectors should be tasked with  
the selected requirements.*

Principles of Good Agency Writing

[Redacted]

25X1A

25X1A

TIB

[Redacted] discusses the importance of clear, concise prose in intelligence reporting and production and outlines the writing requirements of the various Directorates.

25X1A

1000-1200

Panel of DDI Editors

[Redacted]

Working-level editors will discuss their role in intelligence production and the special problems that arise in processing intelligence for final dissemination to the consumer.

1200-1300

LUNCH

25X1A

1300-1630

Short Writing Exercise

[Redacted]

In this first writing exercise, the class will work from a packet of intelligence information reports to produce a short item of finished intelligence using the principles outlined in the morning session.

Wednesday, 30 March

Room 912, C of C

0900-1615

Writing Exercise

[REDACTED]

25X1A

ITB

*The class is divided into three groups of approximately equal size. Each group is given copies of one of three items published in either the daily NID cables or the Regional and Political Analysis issuances. Each class member then rewrites, revises, or edits the item he has been given to improve its clarity, organization, and language. In the afternoon, members of each of the three groups discuss the changes they have made in the material and critique the items from the standpoint of intelligence writing.*

Intelligence Process Course -- Evaluation Form

Name \_\_\_\_\_ (Optional)

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

<u>Slight</u>							<u>Highly Satisfactory</u>
1	2	3	4	5	6	7	

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why.

3. Identify the least effective presentations, visits or exercises and explain why.

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?
