2/2 .
(Administrator) of the man's company. If the sick soldier is unable to reach the General Military Hospital alone, he is accompanied by a hospital attendant on the train or bus or taken in an ambulance. The ambulance would be a military ambulance from his unit or an ambulance from the nearest civilian hospital. The Hospitalization order form would be used also, e.g., if he were assigned to the Military Hospital No. 2 at Shkoder or the Military Hospital of the 2nd Division at Korge.
23. "Upon arrival at the General Military Hospital, Tirana, the soldier is examined by the Duty Physician of the Main Hospital Ambulatorium. This physician prepares for the soldier a personal file (on a cariboard printed form), in which he enters personal data, unit, date of entry and diagnosis. The Hospitalization Order is retained by the Duty Physician; it is the soldier's sole identification document. Every 2h hours the Duty Physician for the hospital changes.
24. "The soldier is then taken by a hospital attendant to one for the four ambulatoriaSurgical, Neurological, Contagious Disease or Internal Diseaseas assigned in his personal hospital file. There he is examined more thoroughly to determine the department to which he is to be assigned during hospitalization. He then takes a bath and shaves. His hair is completely cut. He is issued pajamas, night cost and sliptox1-HUM and taken to his bed.
25.
Hospitalization Order is the sole military identification document issued an ill soldier. He is issued no Flete-Leje or other document for his trip to the hospital. He is issued a food ration, as well as the money for the trip. 50X1-HU
to his wift, he mist rollow several formalities. He must appear before the Komisionit Mediko-Logal (Military Medical-Legal Commission) of the hespital asse paragraph 12. The Haparti Observationit of the hespital has no chief; it is supervised by the Military Medical-Legal Commission. There the soldier is examined before discharge. He then is issued a document called the Flete-Dalja (Order of Discharge from Hospital). In this Flete-Daljo the Military Medical-Legal Commission can: (a) Send the soldier directly back to his original military unit for
1mmediate return to duty. (b) Sond the soldier back to his original military unit for a certain
period of rest before returning to duty.
period of rest before returning to duty. (c) Send him home for a rest period of six months to two years, declaring

- (b) When a soldier is discharged from the Jeneral Military Mospital he is not handed a scaled envelop for the N/Mjek of his unit. He is handed only the Flete-Dalje. The report reaches the N/Mjek through official channels.
- (c) If a soldier is issued a Flete-Dalje for a period of home rest, he must comply with several regulations. First, the Military Hospital phones the soldier's unit that he has been discharged on a certain date. Sometimes the soldier is taken back to his tmit by military or civilian hospital ambulance; otherwise he travels by bus or train and is relatursed for his fare. Meanthile, a copy of his Flete-Dalje is sent by the Military Medical-Legal Commission of the Hospital to Sek. Pergjithshom Shendetesise of the MR. This section prepares a proposal for temporary discharge, which is forwarded to the Sek. VIII Mbrapavjia of the MMK. That body issues the soldier a temporary discharge, which is forwarded to the Seksioni Mobilizim-Cmobilizim (Mobilization and Discharge) of the MIK. This section forwards the order for discharge to the soldier's military unit. This Flete-Cmobilizind (Provizore) (Order of Temporary Discharge) reaches the unit about a fortnight after the soldier has returned from the hospital; he has been relieved of all duties in the interim. Before leaving the unit, i.e. before temporary separation from service, the soldier goes through none of the normal discharge formalities. He is handed his Fle te-Cmobilizimi (Provizore) and allowed to keep one uniform. He heads back to his native to:m or village. He reports to the Zyra Rekrutimit (Recruting Office) upon which he depends and hands to the officer in charge his Flete-Cmobilizim(Provizore). In return he receives the civilian 50X1-HUM identification documents he handed in to this office at induction. How can the soldier demonstrate that he is on a year's sick leave, if his military documents are tetained by the Zyra Hebruti.it? _____ the Zyra Rekrutinit issues the soldier some lort of declaration to carry with his papers in case of S.SH. inspection. A typical Flete-Cmobilizimi (Provizore) might read as follows -- on rosy paper, 21 x 30 cms, with only the heading of the upper corners printed, the rest typewritten:

50X1-HUM

Declassified in Part - Sanitized Copy Approved for Release 2013/07/30: CIA-RDP80-00809A000500460229-5 OCHFIDENTIAL / US OFFICE ALL CHAP 50X1-HUM Teori Larkeisto (Hermiet Elsory) - sin hours seekly

Falologi (Yathelogy) - seven hours "

Farnakologii (phermeology) - four hours "

Mikrobiologii (hermie) hours "

Novrologii (hermology) - four hours " (b) Krycinfermjer - Same corried and theory (for both categorie) of Krycinfermjer) as for (A. jek. The difference in caliber of training is that the course for the Midels is much longer and are detailed. (c) Infermier - Anatory - too hours weekly Physiology - too hours weekly Surgery - seven hours weekly 50X1-HUM Hygience - four hours weekly 50X1-HUM Infected wounds - four hours weakly Leas infacted wounds - four hours weekly 50X1-HUM Markist thoony + six hours weekly 37. Mail three categories of kuruanti aust, regardles, of rank, also take seven hours of military training each week in the so retyard of the General lilitary Tomatal. Then they must do their practical work at the Hoppital.

The place of place of place of practical work of military training cos not so an ossible. 36. The courses at the shkolla Mjeksore tentarelle are continuous. There are no summer holidays as for persons at the Lover Hotha Officers! Ichool in Throna. Thus the kursanti at the Shkolla Mjeksore Ushtarake do not participate in military maneuvers; at least they did not participate in the summer maneuvers that took place in 1952 from 15 to 28 July in the Lushnje, Berat and Permet regions. The school graduates the following Kuadri for the Medical Corps: Every six months: 50 medical attendants 50 trained persons for other health and senitation jobs Every 11 months: 50 Kryeinfermjer Every 18 months : 50 carear Krycinfermer Every four years: 50 N/Mjek 39. "Examinations (theoretical and practical) are given at three stages, depending on the length of a kursant's course. The Sek. Perstithshem Shondetesise of the Mik appoints a special examination commission comprising professors of the Shkolla Mjeksore Ushtarake. No Soviet officers or doctors sit on this commission. Soviet military doctors do occasi mally inspect the school and the course. 50X1-HUM 50X1-HUM 40. "Uniforms: "All kursanti at the Chkolla Mjeksore Ushtarake wear the same type uniform, regardless of rank upon entrance. They wear the regular sweet and winter uniforms for NCO's and soldiers. Their enaulettes are outlined with a green stripe, 1.5 cms wide. In the middle is the symbol of the ledical corps.

all kursanti at the bhkolla Ejeksore Ushtarake wear the 50X1-HUM

some type of uniform, regardless of rank upon entrance. The care or men -- soldier 50X1-HUM 50X1-HUM NCO's and officers -- receive, howver, the same salary they had upon entrance; so they only estensibly lose their rank. Upon graduation: All N/Mjek become Aspirants, unless they joined with that rank; in which case they become M/Togers. The Kryeinfermjers and Infermjers, depending on previous rank, become Roshters (corporals), Kapters (sergoants) or Marechals (sergoant majors). There are few low-ranking Kryeinfermjers and Informjerg. The one at the Coastal Artillery School, Durros, is a Meroshal." Towns of the control CONFIDENTIAL / US OFFICIALS CALY

DEPOS PERGJITHSHEM FARMACIVET USHTERAND

45. "Administration: The Depos Pergjithshen Farmacivet Ushtarake (General Military Drug Depot) of the Albanian Armed Forces is located at the General Military Mospital, Tirana. It is supervised by the Sek. Farmacia of the MMK. The Board of this section consists of:

(a) Captain 2nd Class (Inu) Goya / see paragraph 6 (a) 7 7 Chief.

(1 6)	Toger Llazi Gjeci - Vice-Chief of the Sek. Furnacia and Chief of Pergjithshem Fermacivet Ushtarake.	50X1-HUN
Two military e	employees at the Depos Pergjithsham Farmacivet Ushtaraka are:	
(a)	Toger (fnu) Prokop	50X1-HUM

46. "Mesources: This Depot has medicines and drugs of Albanian, Yugoslav, Soviet, Czech, Ttalian, French, Eritish and US production. Those of non-Soviet or Satellite origin are remnants of the stocks confiscated from private pharmacles after the liberation of Albania in 1945. Hungarian, Rumanian, Soviet and Czech drugs have been imported since 1945. Some drugs and medicines are produced at the laboratory of the Civilian Hospital of the City of Tirana, which is also on Rr. Bajram Curri. The most important stocks in the Depot are:

Soviet penicillin
Czech streptomycin
US cil-type penicillin
US-brand tablets for 'abdominal' typhoid fever
Albanian aspirin
Albanian phials of a calcium proparation
Czech vitamin preparations - A, B, and C
Albanian miknura baceli used against malaria
Albanian camphor oil

(b) Mareshal Nikoll Zela

The chief shortages are quinine and good sodatives. The short stocks at the Depot naturally mean short stocks in the various military infirmaries.

47. Distribution: This Depot supplies medicines and drugs to the Army, Navy, Air Force and Morojtia Popullore, but not to the S.SH. The Sigurimi Statit depends on the Ministry of Interior, which has its own Drug Depot. To obtain supplies from the Depos Pergjithshem Farmacivet Ushtarake a military infirmary or hospital must file a written request with the Sek. Farmacia. The request must have the approval of the Health Section of the regiment or division of which the infirmary or hospital depends. Thus the Kryeinfermier or N/Mjek of the Informjeria of a unit files his request with the Health Section of his regiment or division; the Chief N/Mjek of that body forwards it to the MM. Capt. Goga must CK the request and forward the answer back through official channels. Only then may the Infermjeria of the unit collect supplies at the Depot. The pharmacy of the General Military Hospital of Tirana must follow this same procedure, though the depot is located in its courtyard.

The following sketch map, shows the layout of the General Military Hospital of Tirana and the location of the Depos Forgjithshom Farmacivet Ushtarake -- next page:
