DISTRIBUTION OF NORTH KOREAN ARMED FORCES

Air Force

1. Haeju Airfield

Not one plane on the field. Structures on the field are used as barracks by the Communist Army.

2. Pyongyang Airfield

Three trainers, about 30 fighters, and one transport. The trainers are used for training purposes every day, but, so far, the fighters have remained on the ground. The transport is being used once or twice a week for flights to Wonsan, Chongjin, and Siniuju.

3. Yonggang Airfield

Structures and installations have been abandoned for some time, and there is nothing left except runways. The North Korean Communists are attempting to reconstruct the field by compulsory labor mobilization among the farmers regardless of the amount of farm work they must do.

4. Siniuju Airfield

There were about 100 former Japanese fighter planes on the field but the Soviet Army removed all of them. The field is completely empty today.

5. Hoeryong Airfield

A fire last year swept the field, destroying the hangars and all other installations.
