ZAGREB DENTISTRY SCHOOL GRADUATES FIRST STUDENTS -- Zagreb, Borba, 1 Jul 51

On 30 June, 19 dentists were graduated from the College of Dentistry in Zagreb, the first to graduate from this college since its establishment 4 years ago. Thus far, about 160 students have been enrolled; by the end of 1951, about 100 students will be graduated and will begin practice.

The college has 20 dentist's chairs, a laboratory which can accommodate 40 students, and an institute for preclinic therapy, where students do their practice work. The college has its own library and a museum with a fairly rich collection. The college does not have its own building, but is using four buildings located in various parts of Zagreb.

A shortage of textbooks has been resolved by issuing class lectures in the form of textbooks and manuscripts, which, besides being of practical value in school work, are an important addition to Yugoslav literature on dentistry.

MEDICAL SCHOOL IN ZAJECAR HOLDS FIRST GRADUATION -- Belgrade, Borba, 28 Jun 51

Zajecar, 27 June -- Many srezes in Timok Oblast do not have a sufficient number of doctors or medical assistants, although various contagious diseases, primarily tuberculosis of the lung and endemic syphilis, are still widespread. The inhabitants are so unenlightened medically that quackery is still common.

For this reason, a secondary medical school was established in Zajecar in 1948; its first class is graduating in 1951. These technicians will endeavor to raise the health standards of the inhabitants of Timok Oblast.

During its first year, the school had 22 students, but had no regular instructors except one nurse-instructor. Nevertheless, the school operated normally. The students studied over 20 different general and professional subjects, including all those necessary for the technical training of a medical assistant.

ARMY GROUP TEACHEES SANITATION IN THE SANDZAK -- Zagreb, Borba, 2 Jul 51

Novi Pazar, 1 July -- A Yugoslav Army group is teaching sanitation to residents of the Sandzak. It is now visiting villages in Sjenica Srez.

Before beginning its work in a village, the group holds meetings to explain the importance of its work. Results have been good, but could be improved if the local people's councils, especially the Antifascist Women's Front, give more help.

IMPROVE SANITARY CONDITIONS IN IVANGRAD SREZ -- Zagreb, Borba, 2 Jul 51

Ivangrad, 1 July -- For more than 20 days a group for the improvement of sanitary conditions in villages has been working in Ivangrad Srez, with good results. Thus far the group has visited 15 villages in the area, which comprises three municipal people's councils in Budimlje, Donja Rzanica, and Polica. The group is now visiting villages under the jurisdiction of the Potljice [Potljice?] municipal council.
