WIND MOTORS FOR KOLKHOZES;
INTERNAL COMBUSTION MOTORS

ESTONIA HAS OLD, IMPORTED MODELS -- Tallin, Sovetskaya Estoniya, 13 Apr 52

Wind motors are widely used throughout the Ukraine and in Rostov Oblast. They are used on kolkhozes and sovkhoses for raising well water, even where generators have been installed.

Most of the wind motors in Estonian SSR are old, imported models, and it is time for the kolkhozes to install new machines of domestic make.

The Kherson Plant of the Main Administration of Agricultural Machine Building puts out three suitable types: the TV-5, which has an 18-blade, 5-meter-diameter wind wheel, and can raise water to a height of 75-80 meters, working with a cylinder pump; the TV-8, which has a 24-blade, 8-meter-diameter wind wheel, and can be coupled with a cylinder pump to raise well water to a height of 100 meters; and the VIME-D-12 machine, which has a 12-meter-diameter wind wheel of two to three blades, and is designed to run a generator.

MOTORS TO PUMP WATER FOR CATTLE -- Tashkent, Pravda Vostoka, 9 Apr 52

The Semipalatinsk Machinery Plant of the Ministry of Local Industry Kazakh SSR has begun series production of wind motors designed by the Kazakhstan Affiliate of the All-Union Academy of Agricultural Sciences imeni Lenin. Coupled with pumps, the motors can raise water from wells 50 meters deep and will be used for watering cattle on the range.

STRIVE TO EXCEED DIESEL PRODUCTION -- Tashkent, Pravda Vostoka, 15 Apr 52

In observation of May Day, the Andizhan Stremmashina Plant is striving to exceed its April plan for the production of T-62 diesel motors.
