NEW MODELS AFFORD BETTER MANEUVERING -- Moscow, Moskovskaya Pravda, 2 Jul 52

Up to now, no cranes with a lifting capacity exceeding 1½ tons have been used on the new buildings going up in Moscow. Now, two new UBK-5-50 tower cranes, each of 5 tons lifting capacity, are at work on a 14-story dwelling structure. The cranes are rigged with 30-meter booms, affording ample horizontal moving of the load; former models have to travel along rails to move their loads any considerable horizontal distance. The UBK-5-50 cranes can raise a load to a height of 14 stories.
