SECRE

2 -

as beginning

Mescew beamed 40 km to Fryazino "hutisifly type" antenna. This equipment came from Sachse in Radeberg near Dresden, Germany. This plant is presently also manufacturing the "Leningrad" TV receiver for the USSR. For glide bembs, the beginning (in 1945) was at Fernseh GMbH Tannwald (Iser mountain), Sudentenland, Germany. Prior experiment (1943-4) ef the glide bembs were held at Peenemuende, Germany, uthe German Post Office. Approximately 200 cameras for these glibenbs were removed and hidden, mainly in West Germany (1945). It 1951, the Secret Department of the TV Institute in Leningrad continued to work en the German TV camera, under the chief, Zakharov In the epinien of us Germans, the Soviets did not further development of the TV camera, because they could not ask us questions as we would hen know that they were werking en it. In East Germany perhaps Germans and Soviets are working on TV for military purpout this is merely a personal epinien.	$= i j_{i_1} \cdot \gamma_i$	- 3 -
