I.

25X1

1. As far as the metallurgical industry is concerned, the production figures are disputable.

25X1

25X1

2. By no means was the reorganization of industry in 1951 final. The 1951 changes were but a beginning of a large-scale reconstruction of industry, and not only so in the structural organization of large national enterprises, but also, and principally, in the production programs of individual factories with the tendency toward higher specialization. Viewed from this angle, the production programs stated in the list are somewhat out of date and incomplete. They may serve as an outline of production programs as they were in 1951 and before.
3. This implies also the changes in the structure of national enterprises. However, the possibility of changes is obviously contemplated in footnotes of the list itself.
4. Since the time the information for the list was compiled, some of the plants listed as "under construction" have begun operation: Metallurgical Combine in the area of ZDAR /Section A, page 9, bottom/ - some parts of the plant were put in operation in February 1952, the plant should be completed in 1955. The construction of HUKO /section A, page 9, bottom/ has not been stopped, but slowed down - partial production started in 1952. The completion of HUKO is also scheduled for 1955.

II.

The following is supplementary information which can be added to the list, or other information bringing the list more up to date.

In Section A, Metallurgical Industry in CSR:

1. Page 4, No.4 - supplementary information:  
the plant produces great amount of rails for the Soviet Union  
Manager of the plant: Oldrich WROBEL  
Leading Communist: Jaroslav CUDEK
2. Page 6, No.11 - although the blast furnaces of the Middle Slovakian Iron Works in Pobrezova are designated in the list as old, the plant had, in January 1953, the best results in the whole steel branch as far as the fulfillment of plan is concerned. According to unconfirmed information, the machinery of the plant in Pobrezova was partly replaced and renewed during 1952.
3. Page 8 - Under No 20 is listed a factory of the Bohemian Metal Rolling Mills at Povrly /near Usti nad Labem/. There is no evidence of a factory at Povrly which would belong to the Bohemian Metal Rolling Mills, but there is a factory which should be listed under No.21 on the same page. This factory is known as KOVOHUTE, S.M.KIROV Plant at Povrly. Its production program: copper smelting and refining. The processed copper is supplied to local factories producing cables and other electrical equipment for the Soviet Union and satellites. 25X1
4. Page 8, No.21 - among the various factories of KOVOHUTE, Metallurgical Plant, should be also listed:  
Istebné /Slovakia/- production began on June 29, 1952, parts of the factory still under construction, capacity unknown.

In Section B, Machinery Industry:

1. Page 2 - To the list of individual machinery plants should be added: KOVOSVIT, at SEZIMOVO USTI, which is under the jurisdiction of the Ministry of Heavy Machinery and produces various sorts of heavy machinery for local industry as well as for export. This plant has several branches in Bohemia and some in Moravia, but most of these fall under the jurisdiction of the Ministries for Light Industry and General Machinery.
2. Page 9, under the letter 1/ - SKODA WORKS, Plant ADAMOV /near Brno/: The plant is divided into three parts: 1. Two large halls for the preliminary processing of raw material - built in 1944-46. 2. So-called Old Run, the oldest part of the factory, producing artillery ammunition. 3. So-called New RUN, producing construction materials, RR brakes, and also, since Oct. 1952, some special gadgets for land and sea mines.

3. Page 9, under the letter m/ - SKODA WORKS, Plant LENIN in DUBNICA NAD VAHOM.  
This plant has never been officially called LENIN Plant. Since January 1, 1952, it is officially known as K.J. VOROSHILOV'S WORKS /ZAVODY K.J.VOROSILOVA/ at DUBNICA NAD VAHOM, and it should be considered as an individual national enterprise, not as a branch of the Lenin Works in Plzen or of the former SKODA Works.  
Apart from items listed under the production program, the plant produces also tractors, special anti-aircraft guns, trucks, parts of tanks, and heavy construction materials. General Manager of this plant is a Russian, Ing. KRNOV, leading technician is Ing. MECKO, a Slovak. Apart from regular workers, the plant employs also prisoners from Ilava Prison.
4. Page 13, No.3 - Official name of this plant is THE FIRST BRNO ENGINEERING WORKS /PRVNI BRNENSKA STROJIRNA/ and only the main factory is known as the KLEMENT GOTTLAID Plant UNDER the production program: One of the most important types of production is heavy electrical machinery; in this field the plant is assuming leading role in Czechoslovakia. It produces specially designed electrical machinery for hydroelectric plants under construction in the Soviet Union. In October 1952 a large turbo-compressor, reportedly the largest in the world, was completed and sent to the Soviet Union in some 48 parts. During the opening months of 1953, this type of production suffered from serious shortage of material and some individual shops had to be closed.
5. Page 16, No. 7a - OSTROJ at OPAVA opened production in 1952 /probably in April - date unconfirmed/, and produces mainly pumps, reportedly submarine pumps for the Soviet Union /based on three different refugee reports/. The plant employs approximately 2000 workers. According to recent information, management and offices are at the site of the plant, i.e. the address given in the list as OPAVA, Krnovska 2, is out of date.
6. Page 45, No 44/3 - The plant in HULIN produces mostly textile machinery for export /information of February, 1953/.
7. Page 60, No. 63 - It may be of some interest to note that the main factory of the TESLA Concern /Hlubetin/ completed the construction of the first Czechoslovak television transmitter on April 3, 1953. Another three television transmitters were under construction in May, 1953.

B. MACHINERY INDUSTRY.

According to recent reorganisation, the machinery industry was divided into three independent groups, headed by three Ministries as follows:

- a. Ministry of Heavy Machinery, PRAHA I, Na Frantisku No 1039  
(Ministerstvo Tezkeho Strojirenstvi)
- b. Ministry of Light Industry, PRAHA II, Na Porici 24  
(MINISTERSTVO LEHKEHO PRUMYSLU)
- c. Ministry of General Machinery, PRAHA III, Palackeho nam. 4.  
(MINISTERSTVO VSEOBECNEHO STROJIRENSTVI)

RESEARCH INSTITUTES:

1. Research Institute of Heavy Machinery, PRAHA II, Opletalova 25.
  - a. Research of high frequency electrotechnics, PRAHA III, Malostranske nabrezi No 1.  
Laboratories: PRAHA XVI, Ulice P. Svandy ze Semcic 9  
PRAHA-TROJA  
High tension testing plant, BECHOVICE near Praha (ZKRATOVNA)
  - b. Machinery research, PRAHA VOKOVICE, Kladenska 53
  - c. Theoretical research I, PRAHA I, ul. 28 rujna 13
  - d. Theoretical research II, PRAHA II, Spalena 17
  - e. Metal tooling research, PRAHA II, nam. M. Gorkeho 3  
(Welding group)
  - f. Inventions, PRAHA II, Narodni 18
2. Research Institute for vacuum technics and technology of electrotechnical parts, PRAHA HLOUBETIN, Nademlynska 600.
3. Research Institute for electrotechnical physics, PRAHA II, Karlovo nam. 7.
4. Research Institute for low frequency electrotechnics "A.S. POPOVA", PRAHA STRASNICE, No 800.
5. TECHNA, Research Institute in Nove MESTO NAD VAHOM.
6. VTU (Military Research Institute) in DECIN-PODMOKLY.
7. VTU (Military Research Institute) in TANVALD
8. LVU (Aircraft Research Institute) in PRAHA LETNANY.
9. Research Institute, attached to individual factories

1. SKODA WORKS (LENIN WORKS)? National Corporation.  
SKODOVY ZAVODY (LENINOVY ZAVODY), Narodni Podnik.

Huge Industrial combine, consisting of several self economizing concerns.

Production Program:

Steel Castings, forgings and Pressings up to maximal sizes and weights Bridges and Steel Constructions of all kind, Installation of whole Power Stations, including Generators, Electromotors and Apparatusses.

Complete Installations of factories such as: Mines, Metallurgical Works, Rolling Mills, Gas Works, Burning Plants for waste material, Pumping Stations, Nitrogen Plants, Chemical Works, Glass Works, Paper Mills, Ceramic Works, Brick Works, Cellulose Works, Sugar Factories, Distilleries, Refineries, Breweries, Malt Houses, Dieries, Refrigerating Plants, Ice Plants, Slaughter-Houses, Tabacco Factories, Oil Pressing Plants, Margarine Works, Yeast Cultivating Plants etc.

Transportation means, Steam, Electric and Diesel Engines and Locomotives, RR Motor Cars, Trolley Cars, Tractors, Cranes, Dredgers, River Boats etc.

Hydraulic Presses, Special Machine Tools as SKODA SUR Automatic Lathes, Tools, Gauges, Measuring Instruments etc.

Automatic Machines such as: Packing Machines, Filling Machines, Tablet Compressing Machines, Pelleting Presses, Egg Sorting Machines, Can Manufacturing Machines, Cigarette Machines, Bottle Filling Machines, etc.

War Industry:

Tanks, Armoured Cars, Heavy and Light Guns, AA Guns, Heavy and Light Bomb Shells, Hand Grenades, Light Ammunition, Radars, Aiming Devices, Parts for Jet Engines, Military River Boats, etc.

Individual Plants:

a. SKODA WORKS, Plant LENIN, PLZEN' SKVRNANY.

Management and main Factory: PLZEN' SKVRNANY

Office in PRAHA: PRAHA III, Vodickova 32 (T 39434)

Production Program:

Steel Foundry - about 30.000 tons of castings/year

Grey and Malleable Foundry - about 50.000 tons of castings/year

Forging and Pressings up to Maximal Weights  
High Voltage Electrotechnics, Generators, Aggregates, etc.

War Industry - Tanks, Armoured Cars, AA Guns, Bomb Shells etc

Joint Factories:

1. NYRANY, Mine ZIEGLER - Filling of Light Bombs
2. BLOVICE, form. LEKOV - Manufacture of Pneumatic and Electric Tools
3. CHRAST near PLZEN, form. Suchy, Jouza a Cap
4. Rokycany, form. Iron Works of Rokycany
5. HOLYSOV, form. KOVOZAVODY
6. KOZOLUPY, formerly MOBILA
7. DYSINA near PLZEN, form. CECHURA
8. CERVENA NAD VLTAVOU, form. BECHA
9. NOVY BOR, form. ROCHMANN - Manufacture of artillery shell parts.

Note: Some of the above mentioned factories may presently either form part of an other concern or be abolished.

- b. SKODA WORKS, Plant, PLZEN-DOUDLEVCE.  
Electrotechnical Plant  
Plant GIGANT under construction - planned production of Radars, Aiming devices, instruments - present state unknown
- c. SKODA WORKS, PLANT CHLUMCANY near PLZEN.  
Electrotechnical Plant under construction - Present situation unknown.
- d. SKODA WORKS, Plant PRAHA-SMICHOV.  
Management and main Factory: PRAHA-SMICHOV, Krizova No 1018  
(T 40151), (49251)  
Production Program: Diesel Engines, Compressors, High Pressure Pumps, etc.

Joint Factories:

1. PRAHA-KOSIRE, Vrchlickeho 41, form. WALTER-KOSIRE  
(T 50597, 46495, 46685)
2. PRAHA-ZLICIN(CHABY), form WALTER, (T 47794, 48228)
3. PRAHA-XVI SMICHOV, Plzenska 15, form. KOHOUT (T 44505, 44768)
4. PRAHA XVI, Horejsi nabrezi 368, form. SIDLO (T 44114)
5. HOROVICE, SKODA I, form. Hofmann & Schmidt
6. HOROVICE, SKODA II, form. Löwit & Taussig
7. HOROVICE, SKODA III, form. Jindracek
8. HOROVICE IV,  
(New Foundry under construction)
9. DOLNI MECHOLUPY, form. INDUSTRA

- e. IRON WORKS OF SEDLEC near PLZEN.  
(Zelezarny Sedlec)  
Construction of new factory (Planned production program unknown)
- f. SKODA WORKS, Plant DECIN-PODMOKLY, form. SCHMIDDING  
Prod. Program: Foodstuff Machines, Boilers, Tools, etc.  
Joint Factory:
  - 1. DECIN, Benesovska 432, form. AGTE  
Note: In the Southern part of the main factory in DECIN there was installed:  
VTU - (Military Research Institute) (VOJENSKY TACH-NICKY USTAV), where takes place the research of Jet Engines and Guided Missiles. The practical tests are realized on the Military Airfield in MALACKY, Slovakia.
- g. SKODA WORKS, Plant HRADEC KRALOVE.  
Management and main Plant: HRADEC KRALOVE-KUKLENY  
Production Program: Construction of Bridges, Heavy Machinery, Installations of various factories, parts of mines, etc.  
Joint Factories:
  - 1. HRADEC KRALOVE, form. KRALOVEHRADECKA STROJIRNA A MOSTARNA
  - 2. HRADEC KRALOVE - PLOTISTE
  - 3. HRADEC KRALOVE - LIPENKA
  - 4. PRAHA-HOLESOVICE, Ulice Mlade Gardy 31.
  - 5. OLOMOUC - NOVE SADY, V Kotline 3, form. LINKOVE Brothers
- h. SKODA WORKS, Plant UNICOV.  
New Plant under construction, new Steel Foundry unde construction.  
Present production program: Dredgers, Cranes (planned production unknown)
- i. SKODA WORKS, Plant BRNO-CECHYNSKA (NA DORNYCHU)  
Electrotechnical Plant - manufacture of switches, circuit breakers, electric equipment for Machine Tools, Cranes, Dredgers, etc.
- j. SKODA WORKS, "JULIUS FUCIK" Plant in BRNO-SKLADISTNI Str.  
Electrotechnical Plant, production program the same as ad i.  
Note: This Factory was taken over by the CSR Army in Fall 1951  
(Present production program unknown)
- k. SKODA WORKS, Plant BRNO-HERSPICE  
Electrotechnical Plant under construction  
Note: This factory may replace the "Julius Fucik" Plant in BRNO-SKLADISTNI

1. SKODA WORKS, Plant ADAMOV near BRNO.

Production Program:

Artillery Grenades of all kinds and sizes, Bomb Shells, Heavy Machinery, Construction of Bridges, Manufacture of RR Brakes Type KNORR, etc

m. SKODA WORKS, Plant LENIN in DUBNICA KAD VAHOM. (Slovakia)

Armament and Ammunition Factory, manufacture and repair of guns, bomb shells, parts of Jet Engines, Manufacture of special Automatic Lathes SKODA SUR.

Ammunition Factory in DUBNICA - "UDOLI" - Attached Plant, producing Explosives of all kind.

n. SKODA WORKS, Plant BANOVCE NAD BEBRAVOU (Slovakia)

Planned: Largest Electrotechnical Plant in CSR, in Fall 1951 taken over by the CSR Army - probably Ammunition Plant at present - (Details unknown)

o. SKODA WORKS, SHIPYARDS in KOMARNO (Slovakia)

- I. Old Shipyard
- II. New Shipyard

Production program: River boats (Cargo Boats) and Military boats

p. SKODA WORKS, Plant NOVE MESTO NA MORAVE  
Ammunition Plant, details unknown

q. SKODA WORKS, lateral Workshop in ZDANICE, form. MIKRO  
Details unknown

2. CKD (CESKOMORAVSKA KOLBEN DANEK)

One of the largest Heavy Machinery Concerns in CSR, divided into several self-economizing complexes.

Production Program:

Heavy Machinery, Turbines, Locomotives, Streetcars, dredgers, Cranes and Bridges, Foundry Mechanization Equipment, Special Soviet Orders, Tanks, Planned or realized production of Aircraft Bombs and other war material.

Individual Plants.

a. CKD "STALINGRAD", PRAHA.

Management and main Factory: PRAHA IX-VYSOCANY, Sokolovska No 159 (T 83151, 82751)

Production Program:

Heavy Machinery, Streetcars, Turbines, Bridges, Mass production of Electric Counters, etc.

Steel Foundry - ab. 20.000 tons/year,  
Grey Foundry - ab. 30.000 tons/year

Joint Factories:

1. PRAHA IX-U Spalovny (T 80121, 83422)

2. PRAHA VII-VYSTAVISTE (T 78801)

3. PRAHA VII-HOLESOVICE, Komunardu 36 (T 76864, 77163, 70302)

4. PRAHA XI, Konevova 2 (T 33539, 23861)

5. PRAHA XII? Chrudimska 2, form. DUDA, (T 50551)

6. PRAHA XVI-RADLICE, U Slevarny 109 and 116 (T40433, 40474)

b. CKD "SOKOLOVO", PRAHA.

Management and Main Factory: PRAHA-LIBEN, Ceskomoravská 205 (T 80146, 80503, 81141-5)

Tank plant, Special Soviet Orders as heavy machine tools

Joint Factories:

1. PRAHA-LIBEN, form. Tank Repair Shp "U PRASILU" (T 83767)  
Assemblage and Repair of Tanks

2. CHOCEN

Manufacture of Refrigerators until 1951, present product.  
unknown.

c. CKD "JAN SVERMA" Plant in SLANY.

CKD, Zavod JANA SVERMY, SLANY

Production Program: Dredgers, Heavy Machinery, other details unknown

- d. CKD BUZULUK? CHODOV near KARLOVY VARY.  
Production of Foundry Mechanization Equipment  
Branch Factory:  
1. KOMAROV near HORVICE
- e. CKD "JIRI DIMITROV", Plant BLANSKO.  
Grey Foundry - planned production 40.000 tons/year  
Production program: Heavy Machinery, details unknown  
Branch Factory:  
1. BRNO-KRALOVO POLE  
Grey Foundry - about 1.500 tons/year
- f. SLOVACKE MACHINERY WORKS, UHERSKY BROD (form. CKD UHERSKY BROD)  
(SLOVACKE STROJIRNY, n.p., UHERSKY BROD.)  
New huge plant under construction  
Planned production exactly unknown  
Rumours: Production of Tanks or Locomotives in the future
- g. CKD, SHIPYARDS in USTI NAD LABEM-STREKOV form. SEDLAK & GOERN  
Production program: River Boats, mainly for military purposes
- h. CKD, SHIPYARDS, PRAHA-HOLESOVICE  
Production program: Mainly repairs, exactly unknown  
Branch Factory:  
1. Stechovice, form. CHROUST
- i. Machinery Works of MODRANY (form. CKD MODRANY)  
MODRANSKE STROJIRNY, n.p.  
Production Program: Heavy Machinery, exactly unknown  
Management and Main Factory: MODRANY near PRAHA (T 49190,  
48679, RF 7118, RF 7264)  
Joint Factories:  
1. PETROVICE (T 95006)  
2. RICANY near PRAHA
- j. CKD, Plant CESKA LIPA (form. SIEMENS SCHUCKERT)  
Electrotechnical Plant  
Manufacture of Transformers, other details unknown  
Branch Factories:  
1. SEDLEC near PRAHA XIX, U sedlecke skoly 54 (T 70668, 79809)  
HORICE  
2. HORICE  
3. ROKYTNICE NAD JIZEROU, form. SIEMENS SCHUCKERT
- k. CKD SUMPERK  
New RR Car Plant under construction - details unknown

1. STALIN WORKS, MARTIN (form. CKD KRIVAN, MARTIN)  
CKD J.V. STALINA, n.p., MARTIN.

Huge Plant under construction, for the most part in operation  
New Grey Foundry - about 45,000 tons/year  
Production program: Tanks T 34 Type, built in series per 20  
pieces  
Special 8 wheel Rope Winches for delivery of sticking tanks  
Planned production of Aircraft Bombs - other details unknown

m. KRIVAN CKD, Electrotechnical Plant, BRATISLAVA, Racanska 315.  
Production program:

Electromotors, Transformers, Electrotechnical Implements,  
Electric and Gas Furnaces, Drop Hammers, High Speed Saws,  
Gears, Chains Type Gall, Gear Boxes, Flour Mill Machines,  
Hogh Pressure Fittings, Implements, Die Forgings, Semi-  
products, etc.

Management and Main Factory: BRATISLAVA, Racanska 315.

Branch Factories:

1. KOSICE
2. NIZNI MEDZEV
3. PLESIVEC
4. PRAKOVCE
5. VRUTKY

Production program unknown

Main Factory: OLOMOUC-HREBCIN

Gray Iron Foundry - about 15.000 tons/year  
(A modern, mechanized foundry; mass production  
of fittings of various sizes, delivered probably  
to the concern SIGMA PUMPS in OLOMOUC.)  
Steel Foundry - about 3.000 tons/year

Branch Factory:

1. PROSTEJOV, form. WEST BOHEMIAN IRON WORKS(BRAZDA)

5. UNITED MACHINERY WORKS AND FOUNDRIES OF "BOHUMIR SMERAL".  
SBS, SPOJENE STROJIRNY A SLEVARNY BOHUMIRA SMERALA, n.p.

Production Program:

Castins of all kind made of: gray and malleable cast iron,  
carbon, low and high alloy steel(manganese cast steel, non  
corrosive steel, fireproof steel etc.), Sectional Boilers  
system STRÖBEL, Radiators, etc.

Kaplan Turbines, Mechanical Presses and Shears, Drop Hammers,  
Packing(baling) Presses, Pumps, Locomotive Fittings, Steam  
heating for RR Cars, Steam Ejectors, etc.

Bakery machines, Pulleys, etc.

Note: An exclusive war production unknown

General Management: BRNO, Klazarova 7 (T 12991-5)

Agency in PRAHA: PRAHA II, Vaclavske nam. 17 (T 32092,38517)

Note: Repair shops and Workshops for manufacture of Spare Parts are further located in all larger towns over the whole CSR.

30. AUTOMOBILE WORKS  
AUTOMOBILOVE ZAVODY

Production Program:

Manufacture of Passenger Cars, Type SKODA-TUDOR

Manufacture of Military Cars of various Types

Note: Details unknown.

Management,

Main Plant:

AUTOMOBILE WORKS, PLANT OF "GENERAL SVOBODA",  
MLADA BOLESLAV  
AUTOMOBILOVE ZAVODY, n.p., ZAVOD GENERALA SVOBODY,  
MLADA BOLESLAV.

Note: This plant is one of the best factories of this type in Europe, equiped with moderns machine tools delivered for the most part from USA. (Huge hydraulic presses special machines type GLEASON for tooling of gears, automatic balancing machines for crank-shafts, machines for tooling of crankshaft bearings in one operation, etc.)

Gray Iron Foundry - about 5.000 tons/year

Note: Steel castings were delivered from SKODA WORKS PLZEN

Agency in PRAHA: PRAHA I, Narodni 23 (T 36224)

Branch Factories:

1. VRCHLABI, form. PETERA

2. JABLONEC NAD NISOU

(New Plant, details unknown - allegedly under military control)

3. KVASINY

4. RUZODOL U LIBERCE,

Production Program:

Passenger cars type TATRAPLAN, Heavy Trucks, loading capacity up to 12 tons.

War Production under military control - details unknown  
RR Cars - see RR CAR PLANT TATRA, ad # 25.

Management,

Main Plant: KOPRIVNICE

Steel Foundry	- about 1.500 tons/year
Gray Iron Foundry	- approx. 3.000 tons/year

Branch Factories:

1. STUDENKA, form. MORAVSKOSLEZSKA VOZOVKA  
(Production program unknown)

Note: Other branch factories unknown.

Aircraft Industry.

33. AERO

Production Program:

Parts of Jet fighter bodies, details unknown  
Repair of Aircraft

Management,

Main Factory: PRAHA IX, ulice Julia Fucika 305 (T 81641, 83841)

Branch Factories:

1. RADOTIN, Plant PANTOF, (T RF3110, RF 3125)  
(Manufacture of Dampers and Undercarriage parts)
2. KBELY, form. CKD  
(Repair Shop)

Note: Other branch factories unknown.

34. AVIA, Plan of "J. DIMITROV", PRAHA - LETNANY  
AVIA, Zavod J. DIMITROVA, PRAHA-LETNANY

Production Program:

Manufacture of Jet engines, Aircraft bodies, Heavy Military Trucks, detail unknown.

Factories:

1. PRAHA-LETNANY, Plant AVIA I (T 80041, 81851, 80651)
2. PRAHA-LETNANY, Plant AVIA II  
(New Plant, built by Germans during WWII)
3. KUNOVICE, Old Plant AVIA
4. KUNOVICE, New factory and Airfield under construction

5. ROCHLICE near LIBEREC  
(Pattern Shop)

Note: Other branch factories unknown.

35. RUDY LETOV

Production Program:

Manufacture of Jet Aircraft - details unknown

Building of Jet Aircraft Prototypes - details unknown

Repair of Aircraft

Aeronautical and aerodynamical research

Management,

main Factory: LETNANY (T 83051-59)

(Attached: LVU - Military Research Institute)

Research: aerodynamics, aeronautics, testing  
of Jet engines, parachutes and radars -  
Jet engines and Radars are mainly  
tested while mounted on German bombers  
type Heinkel.

Branch Factories:

1. OLOMOUC

Note: Several branch factories over CSR, exact location  
unknown

36. MOTORLET

Production Program:

Aircraft engines, details unknown

Management,

Main Plant: PRAHA XVII-JINONICE, "J. SVERMA" Plant (T47852,  
43153)

MOTORLET, Zavod JANA SVERMY, PRAHA XVII-JINONICE

Branch Factories:

1. PRAHA-Radlice, Radlicka 105 (T 49807)

2. PRAHA XI-MALESICE  
(Repair and testing of Aircraft engines)

Note: Other branch factories unknown.

37. LET - various Aircraft factories, organization unknown

2. GOTTWALDOV, form. ZLINSKE LETECKE ZAVODY

3. BRUNTAL

Note: Several other factories, mainly under military control are known from hearsay only, no details available.

Auxiliary Automobile and Aircraft Industry.

Note: Immediately after the WWII, the whole production was concentrated in one huge complex PAL, but the immense administrative difficulties led to a new decentralization and this complex was split again into the following concerns:

38. PAL - Management KBELY U PRAHY
39. AEROPAL - Management MODRANY U PRAHY
40. AUTOPAL - Management NOVY JICIN
41. MOTORPAL - Management JIHLAVA
42. MOTORUNION - Management CESKE BUDEJOVICE

Production Program:

Aircraft Board Instruments as Height Finders (Altimeters), Optical Landing Indicators, Speedometers, Angular Velocity Recorders, Gasoline nad Oil Gages, Direction Finders and Compasses, Gyroscopic Flight Direction Compasses, Gyroinclinometers, etc.

Radiators, Fuel Feed Pumps, Fuel, Oil and Air Filters, Fuel pipes and fittings, etc.

Sparks(Plugs) for Aircraft and Automobile engines, Glower Plugs for Diesel engines.

Injection pumps and Nozzles, Carburators, Ignition Timers(Distributors), Dynamos, Magnetos and other Electric Equipment Pistons, Piston Rings, Valves, Screws, etc. Electric Portable Shears, Drills, Grinders and other tools Various types of smaller electromotors, Gas engines, etc.

Organisation:

38. PAL

Management,  
Main Plant: KBELY U PRAHY, Trida cs. Armady, form.

OSTMARKWERKE (T 82941)

Precision Machinery.

43. ZBROJOVKA BRNO, Nat. Corp.

Production Program:

Bicycles, Automatic Milking Machines ZET, Universal Kitchen Machine ROBOT,  
Ball and Roller Bearings;  
Special tools and Gauges as Cutting Tools, Disc and Segment Saws, Cutters and Slotters, Vernier Calipers, Depth and Terminal Gauges, Chucking Devices, Hand Grinders, Special Tools for Standard and Mass Production,  
Injection Pumps for Diesel Engines, Counter and Amplifier Magnets;  
Textil Machines: Sewing Machine ZETINA, Machines for Spinning, Weaving and Finishing Mills, Knitting Machines, Yarn and Cloth Testing Apparatus,  
Graphic Machines: Printing, Bookbinding and Cardboard Machines, Printing Accessories,  
Machine Tools: Filing Machines, Hydraulic Presses for Plastic and Spray Materials, Letter Engraving Machines, Special Machines,  
Office Machines: ZETA Typewriter, ROTAPRINT Multipliers,  
Hunting and Sporting Arms and Ammunition: Rifles, Small Riffles 5,6 x 35, Shot Guns cal. 16, Repeating Rifles of small cal., Hunting Ammunition SELLIER & BELLOT,  
Pyrotechnical Products: Fireworks, Percussion Caps, etc.  
War Production: Aircraft Bombs, Hand Grenades, Bazookas, ~~ex~~ Carabines, Automatic Guns, Light and heavy machine Guns, Ammunition of various calibers, Explosives -  
Other details unknown.

Management:

Main Factory: BRNO "JAN SVERMA" Plant, Lazaretni 7  
(Armament Plant)

Branch Factories:

1. VSETIN  
(Armament and Ammunition Plant)
2. JABLUNKA
