25X1

1. Debrecen Ball Bearing Factory

- a. Origin of machinery: 2 from [redacted] remainder from the USSR, East Germany, and Czechoslovakia. 25X1
- b. Production in 1952 : about 1,000 ball bearings.
- c. Current production : about 10-15,000 per month. The new material supplied is good enough to manufacture bearings of II and III class quality.
- d. Workshops : in the Cavalry Barracks, Széchenyi ut 59, Debrecen. The new factory is still under construction, near the new public cemetery in the vicinity of the streetcar terminal, at the end of **Csepő Street**.
- e. Manpower is mostly drawn from among the local peasantry. For weeks the factory has been advertizing in Magyar Nemzet, etc. for turners of category VI and VII (i.e. the highest). Some of the advertizements have stated the name of the factory, others have not.
- f. In October 1953, negotiations with Maszola were in progress for obtaining 2,500 cu. m. of earth gas from the earth gas well of Biharnagybajom. The ball bearing factory would like to obtain this supply by the summer of 1954.

2. Arms Production

- a. Gun barrels are manufactured in the Diósgyőr Heavy Machine Tools Factory in the following sizes: 37 mm. (originally to have been made in Poland), 47 mm, 57 mm, 85 mm., 122 mm howitzers with 6 m. barrels, 152 mm. Soviet-type barrels.
- b. This factory also manufactures ammunition for the 37 mm.-type (1200 m/sec. muzzle velocity) guns. The technical specifications are in Russian, and both in the original and in the translation mistakes have been made which increases the difficulty of manufacture.
- c. Gun carriages for gun barrels manufactured in Diósgyőr are manufactured at Győr.
