CENTRAL INTELLIGENCE AGENCY

INFORMATION REPORT

This Document contains information affecting the National Defense of the United States, within the meaning of Title 18, Sections 793 and 794, of the U.S. Code, as amended. Its transmission or revelation of its contents to or receipt by an unauthorized person is prohibited by law. The reproduction of this form is prohibited.

1.1 A large plant is located just to the north of Zemianske Kostolany, about four kilometers south of Noveky on the west side of the road from Novaky to Zemianske Kostolany. The entire plant is fenced in, including the railroad tracks, and apparently trains must stop before entering or leaving the plant area. The Novak plant appears to be merely a continuation of the Zemianske Kostolany plant. Some old wooden buildings separate the two plants. Two large metal smoke-stacks could be observed, with yellow-green smoke coming from one of them. Sulfur fumes could be detected in the air, as well as hydro-chloric acid vaport. One large five-story building is apparently the office building for the plant. 2. Just north of the plant, there are nine completed or almost completed dwelling un Most of the residential area of Novaky appeared to be fairly new construction. 3. On the northern side of Novaky, there are some barracks. A few lounging soldiers were seen in town, but no obvious protection around the plant itself, except for the fencing. Comment: The plant complex referred to in this report is the Novaky Chemical Works (Novacke chemicke zavody), National Enterprise. Enclosure: l photograph of the plant of the Novaky Chemical Works at Novaky,	COUNTRY	Ordchoslovakia	REPORT NO.
