1. The subminiature tubes shown at the Leipzig Fair in autumn 1952 were developed at the beginning of 1952 in Funkwerk Erfurt. The two types concerned were DL 176 and DF 176. These two types were produced in very limited quantities in Erfurt on a laboratory scale only.
2. In October 1953, these two types were given to the Roehrenwerk "Anna Seghers", Neuhaus for series production.
3. The VEB Werk fuer Fernmeldewesen in East Berlin tried in vain in December 1953 and January 1954 to procure samples of these subminiature tubes.

1. Comment: [redacted] although the two sub-miniature tubes are shown in the current East German catalogue of tubes which may be used in development and construction work, current (March 1954) attempts by the VEB Funkwerk Koepenick to procure specimens for use there have also been without avail.
