REMARKS

This is UNEVALUATED Information

25X1

1. On 9 December 1954, the Dumbo-type and Kniferest-type radar sets were still observed west of St. Poelten, south of the road leading to Witzendorf. The installation was guarded by sentries wearing red-bordered black epaulets. One truck, 2 van-like trucks and 1 field kitchen were parked in the fenced-in area.
2. On 29 December 1954, the barracks north of the aforementioned road were dismantled, while the Dumbo-type and Kniferest-type radar sets were still located south of the road.

Comment. The Dumbo-type and Fismnet-type radar sets observed north of the road prior to mid-August 1954 were dismantled on 31 August 1954. Since the barracks and van-like truck were also no longer observed, it is assumed that the radar station is no longer being used. 25X1
