MEMORANDUM FOR: [REDACTED]

SUBJECT : EEWG Draft Report

We have reviewed the first complete draft of the EEWG report. We have found a considerable number of places where we would like to suggest changes. The changes fall into two categories: first, minor corrections of small errors and, second, rather major changes based on relative emphasis. In view of the distribution of the draft to your Committee for comments and anticipating some changes from them, we will defer submitting our changes until all suggestions can be considered by you at the same time.
