over with him. TACKLE requirements and targeting. Jim will be gone about ten days. COMOR will continue to function in his absence but I do not know who will be hanging the pictures.

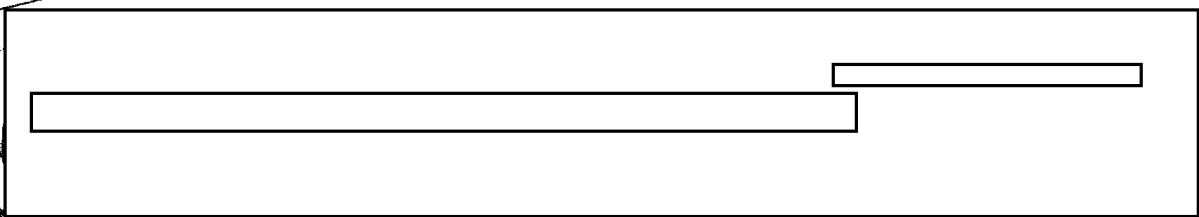

2. Art Lundahl tells me he got a visit from [redacted] of DIA the other day. [redacted] told Art that DIA will begin to move some of its PI's into NPIC beginning about mid-February at a rate which will be determined by the ability to provide TKH clearances. By a year from now, DIA expects to have about 150 physically on board at NPIC.

4. You sent me your notes on the White House photographer and the implications for security with your query, "What to do?" I have talked to Red White about this. Red will ask Bob Bannerman to confer with all Agency components and get examples of the security problems that have been cropping up at the White House recently, list all these examples, and recommend to the DCI that he discuss this problem at some appropriate time with the President and offer the services of our Security Office in restoring order at the White House.
