

NOTES FOR DDCI

6 November 1963

1. Bannerman tells me that there is a routine involved in notifying industrial security officers of the clearances of Government officials who visit industrial plants. He will take care of working out with the appropriate people in [] arrangements for notifying [] of the clearances of the people you take with you on 26 November.

2. You asked whether Manhart's letter about Agency participation in CINCSTRIKE is "the beginning of a run-around or all nice and Kosher." Critchfield says this is not a run-around, that there are no problems. He is highly optimistic of the outcome of our collaboration with the new command. We are sending a team to visit MacDill to discuss security and communications next week and everything is moving along smoothly.

3. Governor Harriman has responded to Mr. McCone's recent letter about the countries assigned to the Special Group (CI). Harriman agrees that the list of countries should be reviewed and that NSAM 124, the basic charter of the Group, may need revision. He asks that action on these matters be held up until he returns from his present trip to Latin America.

4. John Warner advises that Congressman Morrison is preparing an amendment to move DCI to Level II and you to Level III. He will introduce this on the Floor.
