MEMORANDUM FOR: Chief of Operations

SUBJECT: Casebooks on Soviet and Satellite
Espionage and Subversion Operations,
with Special Reference to East Berlin

1. The attached casebooks on Soviet and East German and
other Satellite intelligence and subversion operations are for-
warded for your information. It would be desirable for you to
bring these compilations to the attention of the Deputy Director
(Plans) and the DCI. These copies may be left with the
Director; and, if so, we would appreciate a word in confirmation.

2. The casebooks, both of which are unclassified, were
compiled by CI Staff in cooperation with EE and SR Divisions.
The Soviet Casebook is an updated and revised version of the
casebook prepared for the Department of State to use at the
Summit Conference in May 1960, and later was used by
Ambassador Lodge at the United Nations.

3. The East Berlin Casebook and the Soviet Espionage
Casebook revisions were prepared at the request of Mr. Foy
Kohler, Chairman, Berlin Task Force, for suitable material
to cover the Soviet charges of espionage and subversion habitu-
ally directed against the Powers in West Berlin. As we under-
stand it, material of this type will be used in preparing notes to
the Soviet Government; parts of it may thereafter be made public
in suitable ways (press conferences, releases and the like).
For this reason, materials in the book have been carefully chosen
and, where appropriate, the agreement of foreign liaison and
other U. S. intelligence services to such use has been obtained.

lo copies have been provided to Dave Murphy for the use of the members of the

Berlin Task Force.
