MEMORANDUM FOR: Robert W. Gambino
Chairman, DCI Security Committee

FROM:
Deputy to the DCI for Resource Management

SUBJECT: Classification of Codewords and Titles

1. Several people on my staff have expressed an interest in having a reference which gives the proper security classification and control for codewords and acronyms of compartmented systems when these identifiers are used alone. I am told this type of listing, which would be especially useful for clerical and registry personnel as well as others who deal routinely with such matters, does not exist in a consolidated form. Because a complete listing would cut across program responsibilities, I have turned to you for assistance. What we have in mind is a simple, straight forward reference possibly along the following lines;

<u>CODEWORD</u>	<u>SECURITY CLASSIFICATION</u>	<u>COMPARTMENTED CONTROL</u>
ALPHA	SECRET	YES-BRAVO
EXXON	TOP SECRET	NO

2. Should you decide this is a project you are willing to undertake, I would be glad to see that the product receives the widest possible distribution throughout the Community. STAT
