WASHINGTON, D.C. 20505

7 DEC 1965

MEMORANDUM FOR: Director, National Reconnaissance Office

SUBJECT: Office of Special Projects/CIA Funding Requirements for Applied Research/Advanced Technology and Vulnerability Analysis

1. Pursuant to the Executive Committee discussions of 23 November 1965, Attachments A through C to this memorandum present the Fiscal Year 1966 and 1967 OSP/CIA funding requirements for Applied Research/Advanced Technology and Vulnerability Analysis.

2. Attachment A deals with Vulnerability Analysis to be conducted in support of the hardware development program conducted by SAFSP. Attachment B presents a detailed program plan for Advanced Research and Advanced Technology applications for the remainder of Fiscal Year 1966. Each of these projects has been laid out in detail and in most cases OSP is in receipt of informal or formal proposals from industry for the work presented. Many of these projects are follow-on to efforts conducted in Fiscal Year 1965, however, no funds have been available for the first half of Fiscal Year 1966 so at the current time no work is in progress. Attachment C presents an outline of the Fiscal Year 1967 Applied Research and Advanced Technology program. This work is not currently planned to the same level of detail as the Fiscal Year 1966 program, but specific objectives have been set and budgetary cost estimates made. The total Fiscal Year 1966 funding requirement is [redacted] while the Fiscal Year 1967 is [redacted]. We are particularly anxious to proceed with the Fiscal Year 1966 plan and we would be most happy to provide you with any additional information you may require.

VULNERABILITY ANALYSIS

50X1

Fiscal Year 1966 -   
Fiscal Year 1967 -

OSP is currently discussing with SAFSP-6 the terms of reference for meaningful OSP participation in the Vulnerability Program. OSP proposes to provide an analytical model of the Soviet anti-satellite system and use this model to evaluate the effectiveness of existing and proposed vulnerability reduction measures. To do this, CIA will draw on the extensive effort expended by other Agency components in fulfilling their intelligence analysis mission. OSP will supplement this effort to the extent required to provide the specific expertise needed to formulate the defense system model in the terms most applicable to the problem at hand. In addition, OSP will make recommendations concerning additional intelligence collection efforts that may be required to support the Vulnerability Analysis and participate in the formulation of operating techniques and tactics.

MEMORANDUM FOR: Director, National Reconnaissance Office

SUBJECT: Revisions to the New Search and Surveillance System, Photographic System RFP

1. Attached to the memorandum entitled "CIA Comments on the Reports of the Technical Task Group for the New Photographic Search and Surveillance System" (BYE-0425-65, dtd 19 Nov 65), was a draft RFP for the Photographic System of the New Search and Surveillance System. Since that time, continuing work on this document has resulted in several revisions and a number of corrections. Attached to this memorandum please find replacement pages to be inserted in the RFP.

2. An additional copy of the RFP has been sent to Colonel  of the NRO Staff per his request.
