Description of the plant

The plant consists of a masonry building, about 200x60 meters, with saw-toothed roof and skylights, covered with corrugated stermite (see attached sketch no. 2).

EquipmentFoundry

- 2 BESSEMER pear-shaped converters, internally coated with refractory clay, mounted on two pivots so as to be able to be rotated by a toothed wheel. They are heated with Kokes [sic] coal. Their capacity is about

350 Kilograms.

- 2 electric overhead cranes
- An undetermined number of clay molds

Workshop

- 12 lathes of various types
- 2 turret lathes
- 2 milling cutters
- 4 presses
- 3 vertical drills
- 2-3 emery grinders
- various bench tools

NOTE - Each machine is operated by a small electric motor.

Assembly unit

lamps supported by wooden poles and spaced 30-40 meters apart.

Security

Four sentries armed with automatic rifles are stationed in sentry towers located one on each corner of the former convent.

Each tower is equipped with a searchlight; these searchlights are turned on the penitentiary several times each night.

The guard unit consists of about 40 members of the People's Militia and is under the command of a first lieutenant.
