THIS IS UNEVALUATED INFORMATION

25X1

This report is the result of a joint collection effort by the Air Force, the Army and CIA, and is disseminated in accordance with the provisions of NSCID #7.]

1. [redacted] the Gabor Aren Signal NCO School in Debrecen. / Enclosure A is a sketch of the layout of this school. / [redacted]
2. During my service with the Signal NCO School, I was trained in the operation of the R-10 light radio. After eight hours of training, the student was able to operate the set without further assistance. On the R-20 radio, I received approximately 12-16 hours of training after which I worked with the set without further assistance. I did not receive any training on medium and heavy radios.
3. Other training conducted by the school involved medium radios, R-30 and R-7; heavy radios R-40 and R-50; and instructions for wire laying for phone operators and switchboard operators. The school trained personnel for cable laying and and teletype installations.
4. Training was also conducted for "locators", for searchlight operators and for generator operators. I do not know about the training material or methods in these sections.
5. Our training was conducted in the so-called "atom safe" building. We were told that in case of war that building would be used as a headquarters for some unit. This building was constructed with so-called "atom-proof" doors and window covers. [redacted] attachments one through four which give construction details of this building. /
