SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

- The Niksic Steel Works are situated to the north of the Niksic-Titograd main line approximately 8 kilometers southeast of Niksic. Preliminary work on the construction of the plant was begun in 1949 and, though production was begun in 1953, construction work was still proceeding in 1955. The workshops are all-steel structures. Other buildings, such as offices, training school, workers' settlement, are mostly of masonry or concrete though a few are of brick.
- About 85 per cent of the equipment installed is of German origin, the remainder coming from the "Dragoslav Djordjevic-Gosa" Works at Smederevska Palanka and the "Djuro Djakovic" Works at Slavonski Brod. The Works are scheduled to turn out ST 37 and ST 52 (German DIN standards) steel, electro steel, DIN steel alloys, cast and wrought iron, railway trucks. The plant, however, has never worked to more than 30 per cent of its capacity due to lack of raw materials and insufficient power. In this latter connection the plant is indeed not expected to be in a position to work at maximum capacity until the Savnik hydro electric power station is completed.

Building or Installation (continued)

- B. Workshop B ("B Hala") - Rolling Mill
- A1. Electro steel shop ("Hala Electro-Celika")
- C. Small shop
- D. Small shop
- 5. Store (open)
- 5a. Store (roofed)
- 6. Warehouse for finished products
- 7. Technical Bureau
- 8. Steam power plant
- 9. Inspection office for finished products
- 10. Store for finished goods ready for shipment
- 11. Offices
- 12. Works Goods Station
- 13. Fire Station
- 14. Water tanks
- 15. Garages
- 16. Firemens' quarters
- 17. Works' Railway Station
- 18. Fuel storage depot
- 19. Coal storage bunkers
- 20. Workers' settlement
- 21. Restaurant, cinema, conference hall, etc.
- E. Warehouse for components and smaller products
