- 68.. On May and April of 1963, excavation and road construction was going on at this area. Trudovaks are sheltered in the tents here. I have observed cylinders, stone-breaking machines, trucks at this area. There were mobile repair-houses situated here. This area is protected by guards constantly and is encircled with a barbed-wire. I was sent by my chief while I was working in M.T.S. in Boyanova, and there I would ask for a part of a tractor from the unit stationed. At that time I saw the above machinery, and a place similar to a highway laid with stones which were being produced in the woods. I could not see the main construction area, and the characteristics, because the stone road made a curve into the woods. Only the number of construction machinery, workers (trudovaks) made me think that a large construction was being done there. Since there is no highway extending from the main road, and the labouring area is kept secretly, and it is under protection, I believe that a rocket base was built in this area. It is circa 5-6 km. away from Kamenets village. I can not give its precise location. I can only estimate that it is at a distance of 7 km. from Kamenets-Stefan Karacovo highway.
69. Covered bus-stop of Yambol-Elkhova bus(Karavelov village bus-stop). There is an orchard and an abandoned khosk in it.
70. Small brook having water all the time.
71. Concrete bridge. It has a banister of edged iron. It is 4 m. high, 8 m. long, and 5 m. wide.
72. Vegetable seedling raising place(by steam.)
73. Automobiles with mobile radar antenna. I know that 3 trucks equipped with radars are stationed here.
74. Water depot of Malomir village.
75. Limestone mine.
76. Fig raising districts.
77. Water depot
78. Concrete bridge. It is 30-40 m. long, and 6 m. wide. There is a pedestrian sidewalk 1 m. wide on both sides of the bridge. The bridge is 9 m. above the water level. I don't know the number of stakes supporting the bridge. It has a banister made of edged iron.
79. Railway bridge. It is made of iron.

The explanation of the sketch of ELHOVO town, taken from STOYAN TODOROF KOSTOF

- 1 - Railroad to YAMBOL
- 2 * Road to YAMBOL (It is covered with asphalt and it has a width of about 10-12m)
- 3 - The hollow area, where the water flows . It is covered with grass.
- 4 - Road to the pig raising area. It was constructed in 1963, it is covered with gravel-stone, has a length of 100 m., and a width of 6 m.
- 5 - The guard-box for the pig raising area. (When there is a defection among the animals, they medicate and disinfect the people, entering this area.)
- 6 - The building, used as a depot and offices.
- 7 - Pig raising area.
- 8 - Water motor-pump office.
- 9 - The area of the pig raising organization; it is surrounded by a barbed wire and it is about 50 decares large. This area was isolated against foot-and-mouth disease of the cattle.
 - a) The meadow, where the pigs grazed.
 - b) A high land, in the pig raising area.
- 10 - Transformer.
- 11 - A higher piece of land.
- 12.- A vacant land.
- 13 - A path.
- 14 - Another path. (He doesn't know where it went)
- 15 - A path to the pig raising area. (At the present it is not being used.) In 1963, when a new road was constructed to this area, this path/^{was}not used any more.
- 16 - KIRILOVSKA stream, coming out from KIRILOVO damn.

- 17 - Two concrete bridges, having fences on their sides. When the roads were covered with asphalt in 1962, these bridges were widened too. I don't know what extreme weight they could stand. The length of each bridge is about 6m ., and their widths is about 10-12 m.
- 18 - Railroad bridges. They are made of iron, have a length of about 8m., and don't have any fence on its sides.
- 19 - The area which is used as a vegetable garden, and which belong to people, privately.
- 20 - Vacant land, used as a field.
- 21 - Path.
- 22 - A small concrete bridge, having no fence on the sides. The sides of the bridge consist of a higher level compared with the road.
- 23 - Railroad bridge.
- 24 - Fountain.
- 25 - A small shed in the bee-raising area.
- 26 - The building, where there are three motor-pumps. These work with three/^{large} electric motors. The current is given to them from the city power. These motor-pumps deliver the water, they take from TUNCA, to KIRILOVO damn in three different iron pipes. The diameter of these pipes is 1 m.
- 27 - The well, from which the motor-pumps drew the water. This well has a depth of about 20 m.
- 28 - The wall separating the well from TUNCA River, and preventing it from demolishing.
- 29 - The transformers area, of the network, which provides power for the motor-pumps.
- 30 - A piece of land, which looks as if it is very high.
- 31 - An area, where there are 3-4 very old poplar-trees.
- 32 - A military ammunition area, located on a high hill.
 - a) The place for the guards.
 - b) The points where they are on duty. In these points there are posts, having a wax-cloth on them, which is used as an umbrella, for the guards on duty, when it rains.
