

26 July 1967

MEMORANDUM FOR: CODIB Members

SUBJECT: Forum of Federally Supported Analysis Centers

1. Members of CODIB have been invited to attend or send observers to the Forum of Federally Supported Information Analysis Centers sponsored by COSATI Panel #6, to be held at the National Bureau of Standards, Gaithersburg, Maryland, November 7-8, 1967.
2. Attached is a copy of a letter from Dr. Edward L. Brady, Chairman of COSATI Panel #6, sponsor of the Forum, and a tentative outline of the program. Those who do not participate in the working groups will be invited to tour the facilities of the National Bureau of Standards.
3. There will be a registration fee of \$25-30 which will also cover the cost of transportation from and to downtown Washington and a dinner meeting at the Shoreham Hotel on November 7.
4. Dr. Brady indicated that there would be room for one (possibly two) representatives from each agency represented on CODIB.
5. Arrangements for attendance/participation should be made directly with Dr. Brady's office at National Bureau of Standards, code 164 ext. 2467.

STATINTL

Dear [REDACTED]

In accordance with our conversation, I am writing to give you more information about the forum of federally supported information analysis centers about which we spoke. The forum is under the sponsorship of the Committee on Scientific and Technical Information (COSATI) of the Federal Council for Science and Technology, with arrangements being made by the COSATI Panel on Information Analysis Centers.

The theme is to be "The Flow of Information--Opportunities and Responsibilities of Information Analysis Centers." The purposes are to allow information analysis center representatives to exchange ideas with each other and with government program officials, with the hope of obtaining at least a few solutions to key problems. The meeting will also serve to inform information analysis center managers of COSATI activity and of government interest in their centers. Some of the major policy problems affecting information center activities, such as copyright provisions and security restrictions, will be featured in talks by experts on these matters.

The meeting will open with a brief description of the objectives of the forum and the activities of the COSATI Panel on Information Analysis Centers, presented by myself. This will be followed by a keynote speech. Following the keynote speech, the forum will break up into a series of workshops which will examine specific problems in several areas and, hopefully, suggest solutions to some of them for consideration by COSATI and its member agencies. The second morning of the meeting features a presentation by the Chairman of COSATI on the future of information programs, followed by discussions on security and copyright problems. The afternoon session will consist of reports of the working group chairmen.

I am sending herewith copies of the proposed program.

Sincerely yours,

Edward L. Brady
