*From Agenda Item 2a of
7 August Staff Meeting*

**Draft Terms of Reference
OTR Task Force**

Are there ways for OTR to save personnel and or funds by the application of computers (hardware or software) or other technologies in place of or as a supplement to instructors to other OTR personnel? Applications may include management, course content or methods of instruction. If in the judgment of the Task Force this savings and/or substantive improvement are feasible, please identify the application in general terms, the likely range of investment costs, and the time required to implement. Please report to the DTR in broad terms and do not provide details to any greater extent than is necessary to explain the recommendation.
