SOVIET ADMINISTERED SCHOOL AT GORODOMLYA ISLAND (1948 - 1952)

4. During the year 1948 or 1949, the school administration was turned over to the Soviets. The Soviet personnel consisted of trained teachers, some of whom had had a number of years teaching experience while others had only recently graduated. The nature of the training received by the teachers is not known

50X1-HUM

Organization of Classes

- 5. Under the Soviet administration the approximately 100 German children w 50X1-HUM administered as one unit;
- 6. Children between the ages of six and seven were enrolled in the lowest form or Class 1. While the German parents were anxious to have their children begin their schooling at an early age, the Soviets frowned on this practice, preferring the age of seven as an entrance requirement. The ages of the children in the remaining nine forms were always one or two years higher, so that seven and eight year olds were in the second class, eight and nine year old children in the third class, etc.—and the tenth class was composed of children seventeen years and older.
- 7. Under the Soviet administration received between 30 and 34 hours of instruction per week; the number of hours increasing with the higher 50X1-HUM/classes. For the first seven years of training no tuition was charged. Beyond the seventh year, however, a tuition of 150 rubles was charged per year.
- 8. Attendance was compulsory, although parents had a choice of sending their children to the Island school or the Soviet school in Ostashkov. The price charged for textbooks and writing material was extremely low.
- 9. A class teacher, who was responsible for attendance and served as advisor to the class, was assigned to each class. Students dealt with the school administration through the class teacher. The class teacher did not necessarily instruct his class since each teacher taug50X1-HUM or more subjects of his specialty only.

Examinations, Grades

- 10. At the end of each year of instruction, tested and graded in every subject. The grades ran from 1 to 5; the higher the number the greater the achievement. At the end of the seventh year class, received a comprehensive examination in every subject studied. This examination encompassed not only the last year's work in the subject but all subject matter covered in the preceding years in the respective discipline. Upon satisfactory completion of these comprehensive examinations received a diploma on which grades were listed. Successful completion of the seventh year examination was a requirement for further study. It was also possible to discontinue educational training at this stage. Girls leaving school after the seventh year were qualified, with some additional commercial and technical training, to work as secretaries or draftsmen.
- 11. Most of the German children; however, continued their education past
 the seventh form. At the end of the tenth year students were required
 to pass another comprehensive examination.

similations were given at the Soviet school in Ostashkov. Examinations are standard throughout the Soviet Union and are given on the same date. Having passed the tenth year examination, the student

... SECRET

SECRET

50>

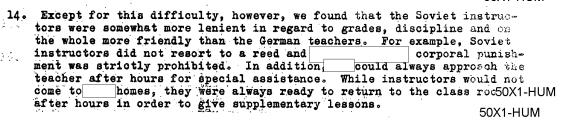

is qualified to enroll in a higher technical institute or university. The tenth year examination, therefore, compares in a sense with the German "Abitur", though the Soviet student has not, at least at this stage, approached quantitatively the same level of training as the German student.

50X1-HUM

- 16. A difference in discipline both in reference to behavior in class and in attitude towards school work also existed. Tardiness or failure 50X1-HUM to promptly comply with the commands of the teacher was not condoned by the Soviet instructor, but at the same time it was not met with the same censure as from German instructors.

 50X1-HUM

POLITICAL INDOCTRINATION

50X1-HUM

- were at no time subjected to any political indoctrination, in the sense that were asked to join a young Communist group or otherwise coerced if we disagreed with the accepted Communist views. Differences of opinion between the instructor and his German class arose repeatedly. The students were not reprimended for failure to accept the views of the instructor, but generally the disagreements ended on an inconclusive note with the instructor asserting that his views constituted the generally accepted position on the particular question.
- 18. While Communism was not overtly or forcefully propagandized, nevertheless received some form of subtle indoctrination in the social
 sciences, such as the course on "The Constitution of the USSR" (given
 in the Seventh Year), and references to current events which instructors would invariably interject into the lectures whether appropriate
 or not in terms of the subject matter on hand. Thus for example, we
 were given the Soviet interpretation of the origin of the Korean war,
 the defeat of Chiang Kai Shek and his position in Formosa, and the
 shooting down of an American airplane over the Baltic Sea.

Constitutional History

During the seventh year, a course on the Constitution of the Soviet Union, which treated the developments in the Soviet Union from 1917 to the present, was added to the curriculum. examined the role 50X1-HUM of the Soviet legislatures, the organization of the judiciary system, and the executive. The procedure for the election of representatives from the lowest to the highest legislature was studied, as was the method of appointment of Presidium Members and other ministers and their functions.

SECRET

SECRET

50X1

- 20. Strong emphasis was placed on the role of the Soviet citizen in the Soviet State, and particularly his relationship to the socialized property. The civil liberties of the citizen were examined as the teacher elaborated on the rights of free speech and assembly in the USSR. It was pointed out that these freedoms are guaranteed in the Constitution but that protection against their misuse is necessary. Thus the right of free assembly exists, but permission must be obtained from the authorities; freedom of speech exists but the speaker must not misuse his platform to injure the nation. "Criticism from below" is welcomed and channels for complaint and correction exist. Failure to exhaust these channels prior to criticizing the action of the state constitutes a misuse of the freedom of speech.
- 21. Frequently the instructor would compare the conditions in the Soviet Union with those of other nations. The demo cracies of the West were criticized as "sham" democracies, and it was stated that it is a contradiction of terms to speak of democracy in a capitalist society. The benefits of the citizens of the Soviet Union in comparison with the West were cited: Unlimited possibility for advancement unhampered by a rigid class structure; the existence of recreation and rest centers for workers; social security which makes age a blessing and not a curse; the greater moral inspiration and satisfaction which comes from working for the common good instead of the self. The awkward expressions of a sixteen year old at this point had been replaced by phrases and concepts that clearly demonstrated rote memory.

History of Russia

22. In this class, given during our seventh year, the reasons for the long history of Russian backwardness were studied. The invasions by the Mongols, the Tartar yoke, and the fact that the Renaissance was halted at the frontiers of Russia, were cited. It was pointed out by the instructor that other nations had wasted the opportunity that history had offered them and that only Russia, which had been denied these benefits, finally raised herself by her own bootstraps. With great pride, the technical advances that had been made in the years since the revolution were recounted, the miles of new railroad tracks; the expansion of rolling stock, the records established by Soviet fliers, the new tractor plants that had been constructed, and the increase in the Soviet merchant marine. In addition, over much opposition from the German students, the instructor would credit Russian citizens with innumerable inventions and discoveries.

Geography

23. Except for a very general treatment of the various continents, the study of geography dealt primarily with the Soviet Union. The political and geographic division of the land were studied, as well as other aspects such as minerals, deposits, plant distribution, soil composition, effects of rain, etc. A great deal of emphasis was placed on the problem of diverse nationalities in the Soviet Union. Their cultures were examined and we learned of their individual languages, music, literature. It was also pointed out that the policy of the government is to encourage the development of these diverse cultures and that towards this end the languages in particular are cultivated. This was offered as evidence that the nationalities are not enslaved people, but rather free and equal members of the Socialist community. If the nationalities are backward, their cultures are not inferior and it was the duty of the more developed to assist the others.

		on to the above subjects,	
	instruction was given in a course ent	itled "Darwinism".	

PARAMILITARY TRAINING AND PHYSICAL CULTURE

26. Very little emphasis was placed on physical training in the Soviet administered school at Gorodomlya. No more than two hours each week of general athletics, consisting of skiing, and track and field exercises were given to the students of the eighth form.

SECRET

50X1-HUM

Kirker and the State of the The state of the s the Market and the SECRET 50X1 8 8 G classes received similar training for the same number of hours each much greater emphasis was placed on physical 50X1-HUM training in the Soviet school in Ostashkov. There, children were instructed among other things in the climbing of trees and other obstacles, and also received instruction in the throwing of simulated hand grenades. 50X1-HUM no overt indoctrination was Comment: encountered at the Gorodomlya School. It is obvious, however, that students were propagandized in a manner which left the students unaware of this fact. 50X1-HUM This was particularly true in the teaching of history, constitutional history and geography. Although the school was a hybrid institution neither 50X1-HUM 4 purely German nor Soviet, it is likely that the program was similar to and on the same scholastic level as standard Soviet schools. This is reflected in the requirement that German students at the Island school pass the

standard all-Soviet examinations at the end of the seventh and tenth school
