- In August 1953 the Zemag Zeitz manufactured two heavy briquette presses. The steel construction division fabricated pressure feed conveyors for the USSR to Soviet specifications. This is a new production line. Six heavy railway cars were completely overhauled, and 16 cranes for auto trucks were manufactured. A large railway crane is still under construction.
- The boiler division manufactured steam boilers for Soviet plants. The boilers are coated with gray anti-rust and were given numbers corresponding to those in the plans. According to the reports of engineers, they are for Soviet hydrogenation plants. The material was delivered from the Soviet Union. Four boilers about three meters long and 1.8 meters in diameter leave the works monthly.
- Shafts of various sizes are currently being turned out for the SAG Bleichert, and crankshafts 3.5 meters long are being supplied to Soviet shipyards or marine engine factories. The shaft ends have diameters of 15 to 20 cm. They are delivered first to the Sächsische Edelmetallhärtereier in Leipzig.
