1. The EFEM division of the HF Werks, Berlin-Oberschöneweide, manufactured 9 thermoscouples in January 1954. They have not yet been shipped. Two measuring amplifiers developed for the Soviet Union are just going from the laboratory into production. They are a line-frequency amplifier with a range between 1 Hz and 5,000 Hz, and another with a range between 1 kHz. Twelve of these amplifiers are ordered for the month of February 1954.
2. Poland received two grinding machines for point bearings and the Soviet Union five similar machines in January 1954.
3. Nineteen temperature coefficient measuring instruments altogether have so far been shipped from the works. These instruments are no longer being manufactured.
4. A new shipment of 3 kg of germanium has been received from the Soviet Union, to be used in the manufacture of transistors. The material is to be tested.
