Joe [Signature]

18 October 1957

Dear Dan: STATOTHR

Please direct [redacted] to perform the following work:

1. Mock-up one seat kit using a standard AF container, which is being sent to him by LAC. This is to be made for use with our ejection seat modification. The configuration is to be as discussed by [redacted] 16 October. It should include provisions for interchangeable left or right suit attachment and an emergency system activation by a handle on the forward edge of the kit. The emergency activation handle cannot be in the center of the kit as this will interfere with the ejection handle. The kit should be made with a view to exchanging components from the old kits with a minimum effort and minimum new procurement.

STATOTHR

2. Inspect and repair as necessary the seat kit used by [redacted] and at the same time modify it to include an emergency oxygen activation on the front of the kit.

ATOTHR

STATOTHR

When this work is complete, Lt. [redacted] will visit Buffalo to inspect both kits.

Sincerely,

[redacted signature block]
